

Power Platform Health Check Assessment

Customer challenges

- **83%** of organizations have more than one data breach. The average cost of a data breach in 2023 was \$4.45m¹.
- **70%** of new business applications will use low-code/ no-code technologies by 2025².
- **87%** of CIOs surveyed say low-code is effective in helping reduce costs, increase efficiencies, and modernize legacy applications³.

Solution highlights

Gain an insight into the health of your Microsoft® Power Platform tenant by analyzing your environment against recommended best practice guidance. Kyndryl will help in identifying and diagnosing your issues and risks. Work with certified experts to review your results and develop a plan that limits risk but ensures successful adoption of this no-code/ low-code platform.

Customer benefits

- 1** Get an overview of activity in your Power Platform tenant with remediation steps aligned with Microsoft best practices.
- 2** Provide oversight to data sources being accessed, ensuring compliance and reducing risk.
- 3** Organizations adopting and utilizing Microsoft Power Platform can see a 502% ROI over three years and payback within 11 months⁴.
