# The world is riskier than it used to be, and as the amount of data increases so does the risk of data loss.

Enterprise data is growing at an exponential rate, driven by new technologies. Data breaches continue to be costlier year after year. Managing and safeguarding your enterprise data is challenging.

## CHALLENGES

- Increased risk of data loss due to disruption, outage, or disaster
- Rising costs of data as well as application protection, backup, and continuity
- Need to comply with changing government and industry regulatory requirements

## IDEAL SOLUTION

- Manage data to efficiently protect it
- Reduce costs
- Manage compliance requirements in a hybrid IT or cloud environment

## DESIRED OUTCOMES

- A fully managed, scalable, and cost-effective data protection solution that can help ensure your business is "always on."
- Financially backed Service Levels
- Anywhere, Anytime access to information in the enterprise

# kyndryl

## Kyndryl Managed Backup Services

Offers a fully managed, end-to-end backup services in a security-rich environment. Manage your backup with robust on-site, off-site, and hybrid cloud-based security.
