Welcome to SensorMine®
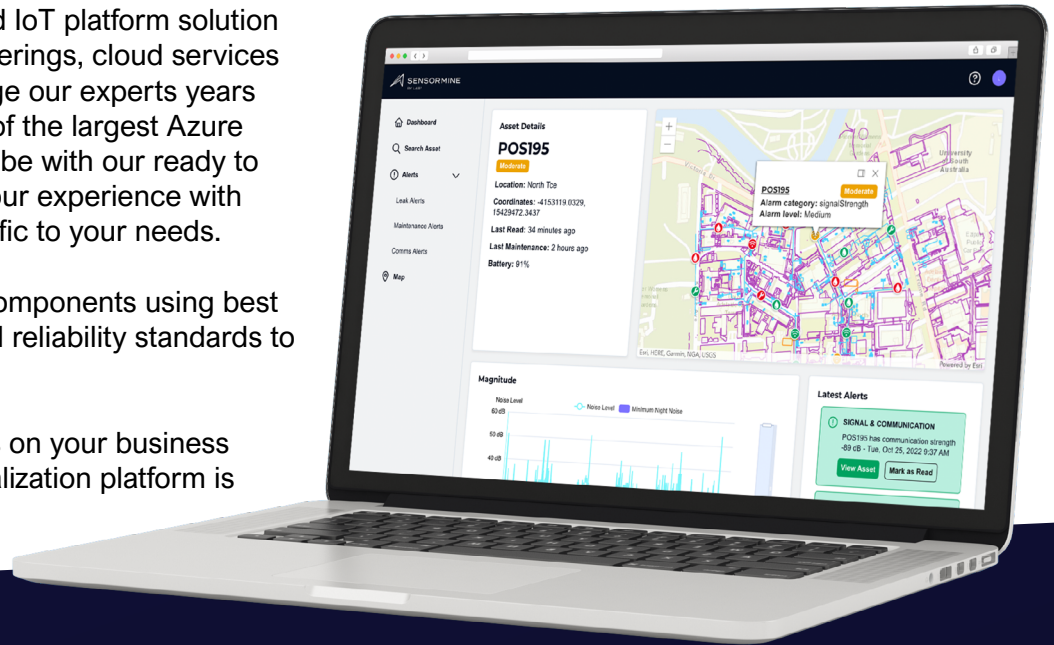

SensorMine is a LAB3 designed IoT platform solution that encompasses hardware offerings, cloud services and managed services. Leverage our experts years of experience deploying some of the largest Azure implementations around the globe with our ready to go solution kits, or co-design your experience with customisable dashboards specific to your needs.

Crafted from Microsoft Azure components using best practice security, scalability and reliability standards to deliver a SaaS IoT Platform.

With SensorMine you can focus on your business knowing your data, AI and visualization platform is taken care of.

Your gateway to a goldmine of real time data

End-to-end IoT Solutions

From purpose-built hardware, to network communications, edge processing and connectivity, device management, all the way through to data analytics dashboards and insights.

Solution kits to solve Industry Problems

Next level visualisation and analytics tools make data easy to use and easy to understand. Enjoy a user experience that is smooth and detail-rich across a range of 2D and 3D visualisations.

Unified Device Management

Manage devices across vast remote areas, across fleets, and span many use cases. Often customers want the value of an IoT capability without the responsibility of running it. That's where SensorMine shines!
