

LambdaTest Features Set

Test Execution

Features	Benefit
Online Cross Browser testing	Manual live-interactive cross-browser testing
Selenium Testing	Run Selenium scripts on cloud-based infrastructure
Cypress Testing	Run Cypress scripts on cloud-based infrastructure
On-Premise Selenium Grid	Our cloud infrastructure paired with the security of your firewall
Native App Testing	Live interactive app testing on Android and iOS devices
Real Devices Cloud	Test websites and applications on real devices
Automation Testing Cloud	Run automation tests on a scalable cloud-based infrastructure

Unique IP

Features	Benefit
HyperExecute	Blazing fast next-gen automation testing cloud

Visual Regression

Features	Benefit
Visual Regression Cloud	Pixel-by-pixel UI comparison

Extensibility

Features	Benefit
LT Browser	Next-gen browser to build, test and debug responsive websites
Underpass	A GUI desktop application for secure local host testing.

120+

Integrations

Integrate LambdaTest with your favourite tool and save yourself from manually managing bugs and tasks.

Value Statements

- Speed** - Reduce developer wait time, accelerate the time to market, and introduce new features faster than ever.
- Reliability** - Reliable cloud-based platform that has almost zero flakiness.
- Customer Experience** - Best and most reliable customer support in the industry. Dedicated support is just a click away.

- Cost-effective** - Reduce test execution and infrastructure costs by up to 50%

- Scalability** - Accelerate your whole pipeline from dev to release. Get faster feedback and manage flaky tests at scale. Scale up or scale down to suit your requirements.
