Security and Governance Production Readiness

Customer Azure Cloud Solution Validation

Ensure your solution is production ready for the Azure cloud. Go from isolated application development to secure and resilient, scalable production environment that is controlled and governed.

Security and Architecture Validation

Review customer Azure hosted solution and provide guidance to enhance security and resilience.

Ensure cloud solution meets best practices

- Increase Security Posture
- Add Governance
- Monitor Compliance

Improved Security

- Leverage the best and latest cloud native security features
- Gain better insights into your security posture
- Lock down open endpoints

Keep your solution and data safe

Increased Resilience

- Enhance the resilience of your applications
- Identify single points of failure
- Expert best practice guidance to ensure maximum availability to your customers and users.

Ensure your solution is resilient and scalable

Governance and Visibility

- Define and ensure organizational policies are being followed
- Control user deployments
- Gain better visibility on costs and Azure usage.

Know what is happening in your cloud environment

"We now feel confident that our solutions and cloud implementation for our customers around the globe are enterprise scale and secure.

- Mark Nicholls, Managing Director, Pantechnik International

LANET

Security and Governance Production Readiness, business benefits.

LA⌄NET

Proven Results in over 50 deployments

- Over 50 successful reviews and deployments
- 50% reduction in TCO
- Increased security, resilience and insights

Proof & Statistics of Joint Solution

- Qualitative Proof
- Increased Service Uptime
- Reduced Support due to implementation of best practices

Cloud Security and Governance Package

Our promise to you

We will ensure your systems are as resilient as they can be in the cloud.

An offer to get you started

- Short and effective review service to gain insights and best practice knowledge.
- Quickly identify gaps and improvement opportunities.
- Gap analysis of your cloud environment and solutions.
- Effective short, medium and long term guidance.

Costs	Agility	Service Quality	New Scenarios

Tangible Benefits – Fast!

- Benefit from our experience of global Azure solutions working with many vertical industries from small to enterprise since Azure was released.
- Reduce implementation and advisory costs with our efficient but high value services.
- Quickly realize benefits and avoid large scale and lengthy in depth analysis.

Why LA NET Limited ?

With our understanding and experience of building global enterprise scale solutions in Azure you can be confident that your workloads are as secure and resilient as they can be.
