

# Azure PostgreSQL Migration Assessment

## About PostgreSQL Migration Assessment

Our Azure PostgreSQL Migration Assessment service helps you find out if your PostgreSQL database can be migrated to Azure.

Our team of experts will perform a detailed analysis and provide an actionable report on what changes need to be made in order for your database to run on Azure.

## What you'll get from our 3-day Migration Assessment

### Information about Readiness for Migration

We'll determine if your database is ready for migration, and if it isn't, provide guidance on how to get there.

### Estimate of the Time

We'll assess how long the migration process will take, so you can make informed decisions about whether or not it's worth it for your organization.

### Custom-tailored Database Migration Plan

We'll assess your needs and requirements so that we can create a custom-tailored database migration plan for your business.

## Why should you let Langate perform the migration?

We've got years of experience working with PostgreSQL databases—and especially with migration to Azure.

We know how important it is for companies like yours to remain competitive. Let our team of experts help you stay competitive and up to date with today's leading cloud services platform today, Azure!
