

Lanham E-Ship Analytics

E-Ship Analytics empowers operations and warehouse teams to make smarter decisions by transforming shipping data into actionable intelligence. From staffing and performance to cost analysis and carrier trends, this app delivers a comprehensive view of your shipping activity -- all in customizable, user-friendly dashboards.

Key Features:

- **Staffing Insights:** Analyze historical shipping volumes to forecast staffing needs with confidence.
- **Performance Metrics:** Track productivity by user to identify top performers and training opportunities.
- **Flexible Time Comparisons:** Define custom time periods by shipping agent, location, packing station, and employee to compare year-over-year performance.
- **Interactive Charts:** Choose chart types, hover for exact values, and drill down to view detailed package data.
- **Chart Summaries:** View quick statistical summaries and access "Learn more" links for deeper understanding.
- **Financial Visibility:** Compare shipping costs vs. charges to monitor profits margins and spot carrier spend trends.
- **Packing Station Analytics:** See proportional comparisons of shipping volume among packing stations.
- **Peak Period Detection:** Identify high-volume shipping windows to plan resources effectively.
- **Excel Export & Print Reports:** Download data or generate print-ready reports with charts.
- **Configurable Dashboards:** Personalize your dashboard to keep the most relevant data front and center.

Whether you're managing a single warehouse or multi-location operation, E-Ship Analytics helps you streamline workflows, reduce costs, and improve performance across the board.
