Technology for Social Impact [TSI]

Why are we the right fit for your organization?

With our breadth of experience working in the Non-profit sector, **LAN Infotech understands your need to begin the adoption of modern workplace solutions.** Our experts will provide you the tools to promote a secure work environment while solving specific Non-profit workplace needs such as collaboration with volunteers, donors and board members. We are committed to our community and look forward to support non-profits of all sizes.

Enable the power of modern technology!

Fundamentals

TSI enables nonprofits who may not have the resources to begin exploring their options. LAN Infotech is committed to bridging this gap by offering them an opportunity to build out a customized cloud strategy.
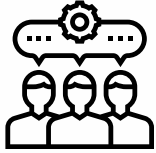

Our Approach

Your entity is entirely different than a traditional corporate enterprise, it takes a slightly different approach led by a strategic initiative to successfully leverage modern tools.

We will:
- Carefully evaluate your budget
- Research creative ways such as grants and Microsoft offers to minimize IT expenses
- Provide solutions allow you to invest in programs that are evoking positive change inside of our communities.

What is included in each package?
