Azure Site Recovery Consult and Deployment

Azure Site Recovery

Protect yourself from IT infrastructure failures with Azure Site Recovery. The platform will ensure business continuity, and our team will carry out all the necessary implementation work, namely:

1. Analysis of the existing infrastructure.
2. Design.
3. Deployment of cloud components.
4. Set up synchronization with Azure AD.
5. Setting up routing.
5. Configuring replication.
6. System testing.
7. Training of administrators.
