Donation Module

GiftBox donation module provides the key functions to automate and streamline the process of donation including printing and issuing receipts; capturing rejected transactions, cancelling or re-processing them. Donation module can accommodate various types of donations like credit card, cheque and cash. It can also issue different receipt formats using templates created from Microsoft Word.

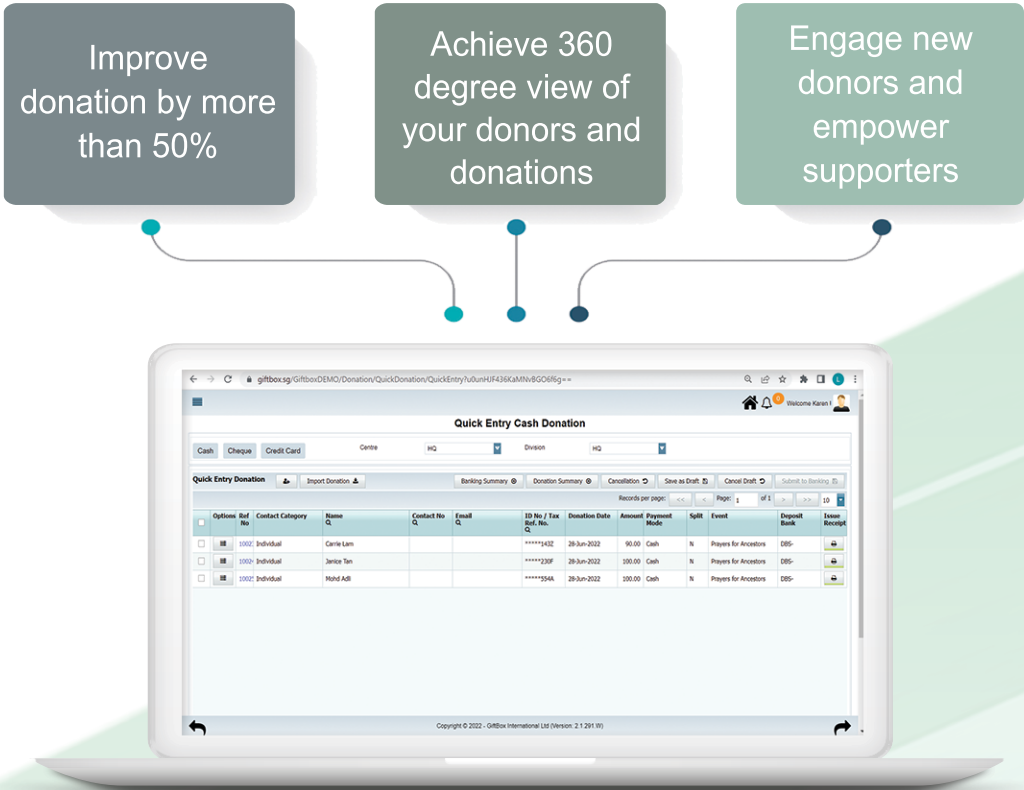

ABOUT GIFTBOX

Giftbox is a powerful, affordable web-based fundraising software for charities, big and small. We help charities increase operational efficiencies and reduce costs by eliminating so much manual paperwork.

The built-in functionality of audit trails, authorisation mechanism and internal check and control makes the donation process secure and conforms to audit requirements.
