Causality Understanding

- Focus on **north star metrics** being **customer centric**.
- Engage with customers who are **more receptive** to our interventions.

- **Automated** marketing operations
- **Customer-centric engagement** for potential business growth rather than considering lead score
- **Onboarding** new customer with **look-a-like** approach
- Optimal intervention to **reactivate dormant customer**

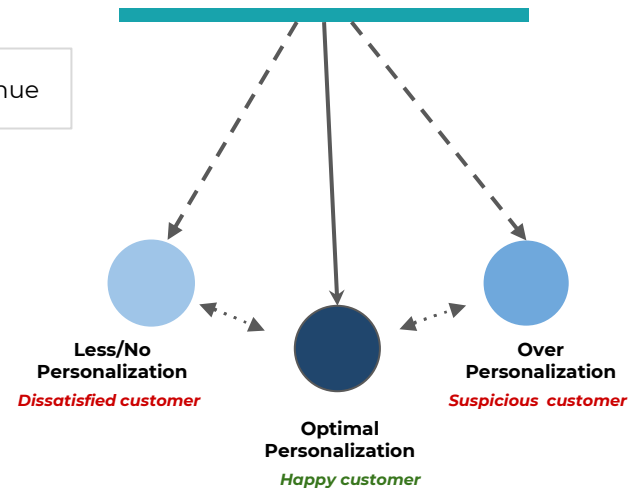

# Intervention Effectiveness Analysis : Discovering Room for Growth

Hospitality client and LatentView have developed a model that accurately predicts **co-branded credit card usage**. With an average monthly sales of 24,000 cards, the **model identifies 83% of conversions from the top 20% customers selected.**

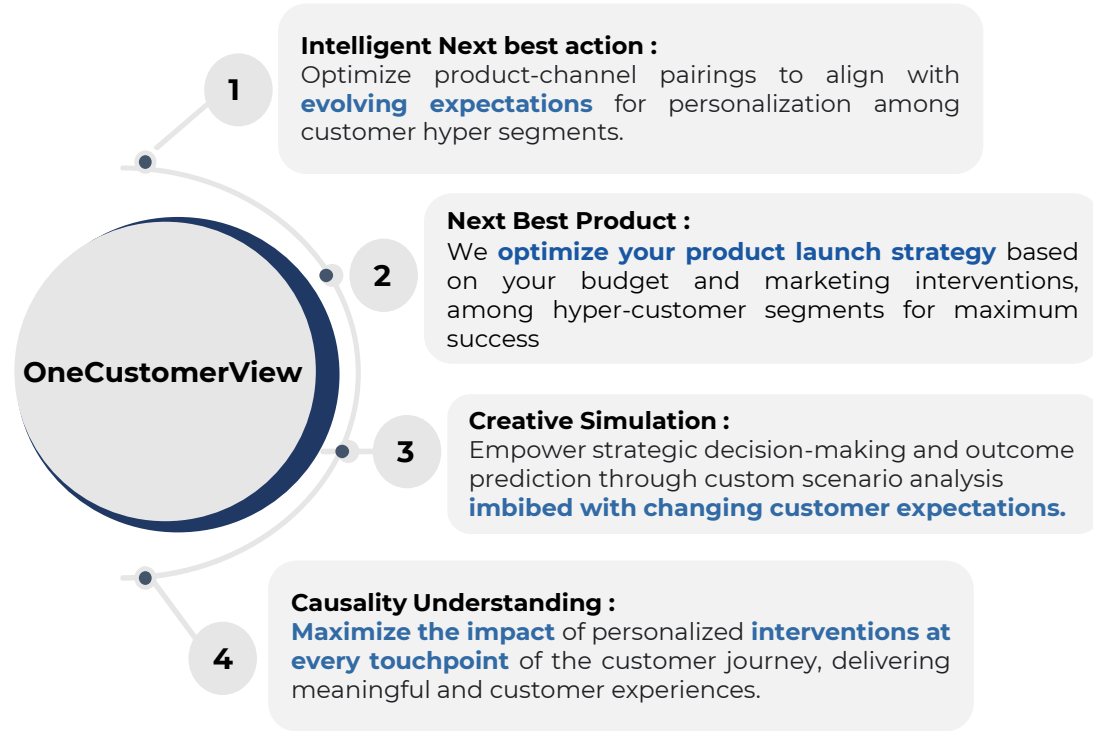

✓ Personalization will ↑ 40% revenue

**Optimal Zone** fluctuates with time, customer experience and microsegment- constant need to monitor for optimal personalization

# Identifying customer preference in every touch is the way forward

4 key elements which we follow to bring **optimal personalization** to decision making

## Benefits

- Reduced decision time
- Quick adoption to emerging needs with instant pivoting
- Hypersegmentation
- Informed Strategic Decision making based on Causal Understanding.

## Outcome

- Optimal sales funnel
- Reduction in Churn rate
- Increased Customer Lifetime Value.
- Optimal targeting of the **right audience, at the right time, through the right campaign, with the right product & strategy**

# With simplicity in the design to enable instant adoption and value realisation

## Zero Infra Cost

- **New Infrastructure Architecture is needless** with internal data emphasis
- OCV can **seamlessly integrate with current infrastructure** for optimal operation
- OCV implementation led to **better improvement** with new insights

## No Reliance on External Data

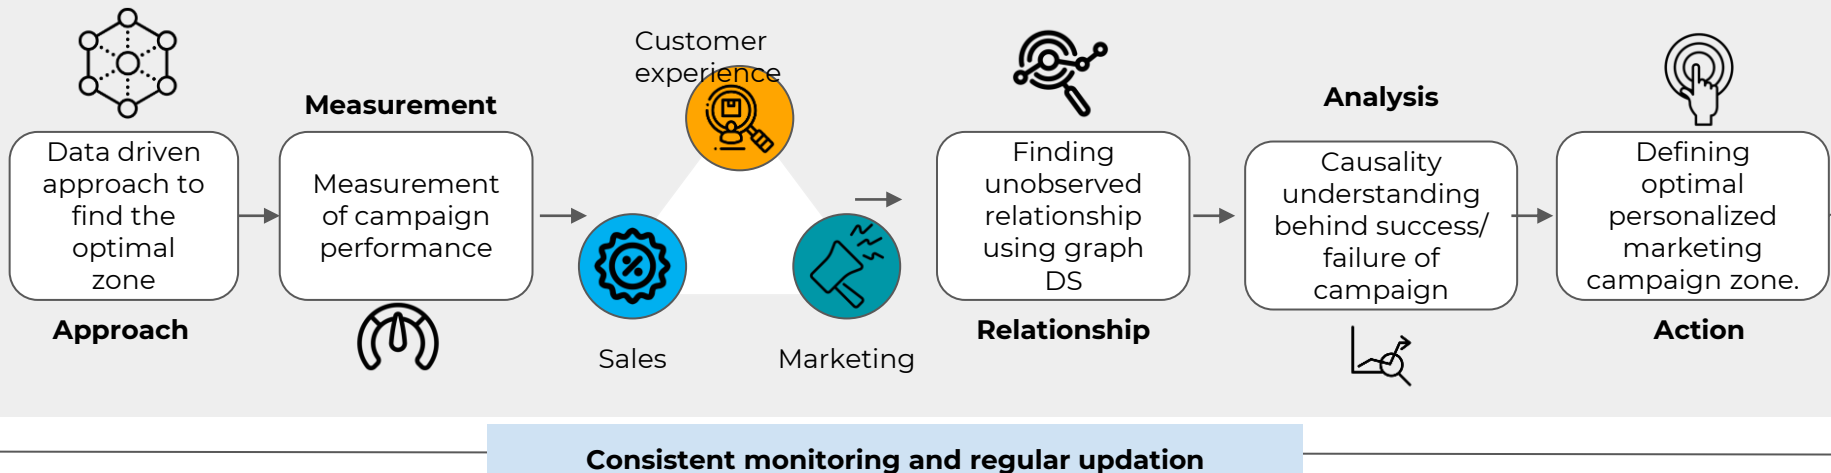

- Analysing **external data** for marketing **outweighs the value of the insights** it provides.
- OCV enables extraction of **reliable insights** from well-structured **internal intelligence**.
- OCV leveraged internal data, producing better outcomes.

## Easy Adoption and Reduce Time to Value

- **Marktech solutions** need new business practices, **ignoring existing models**
- But, OCV insights integrate smoothly into current practices for **streamlined adoption**.
- Since, OCV implementation requires **minimal SME involvement**, **speeding up improvisation**.

# How we can achieve Optimal Personalization?

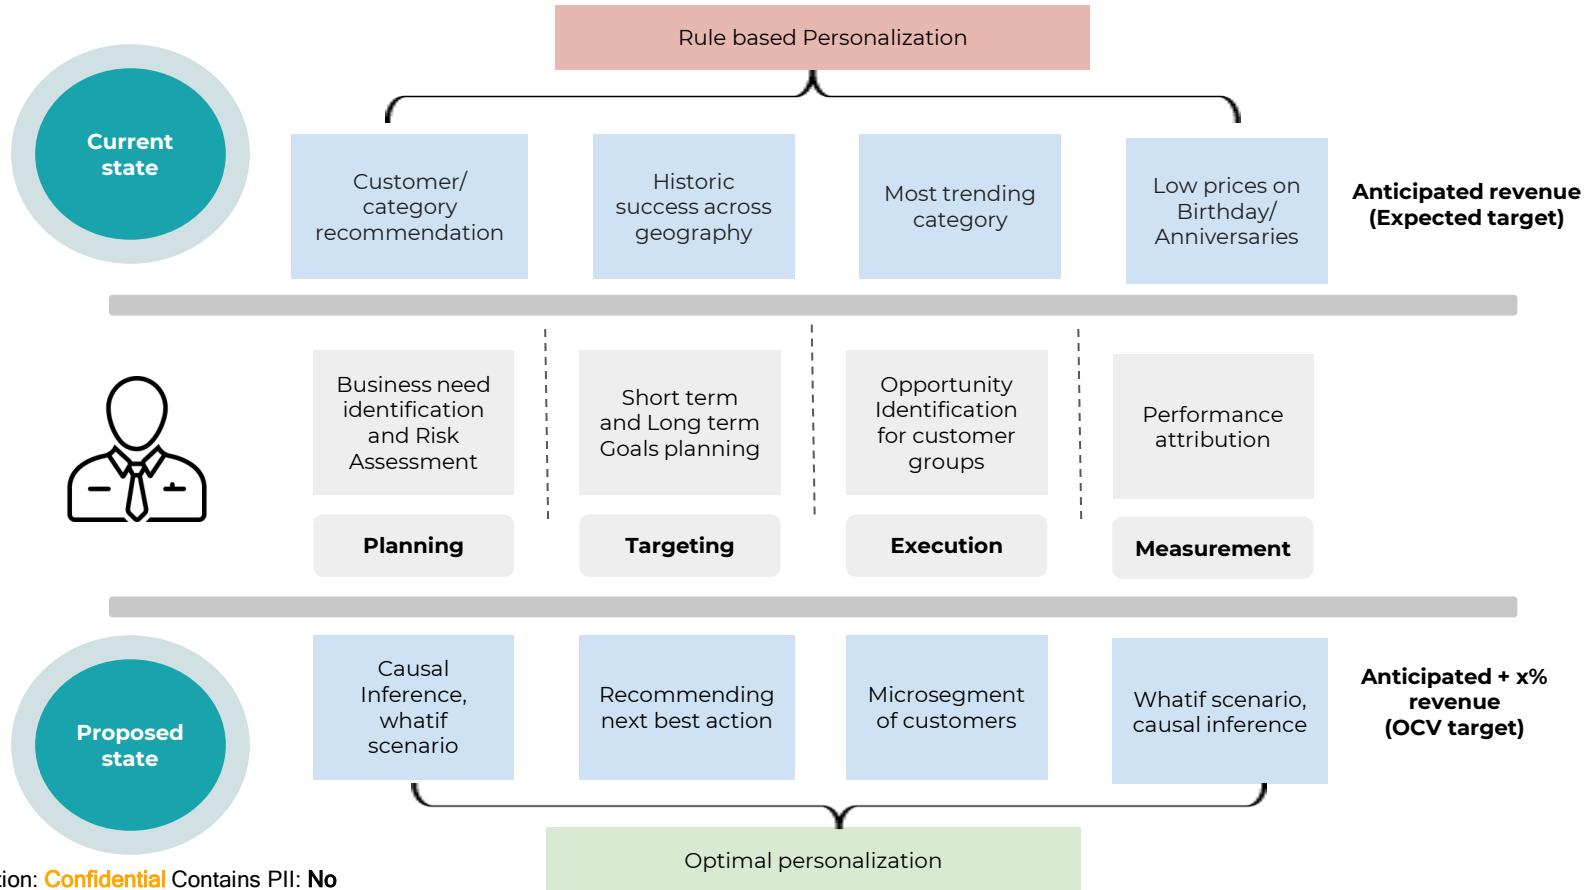

## Key Deliverables

- **Customer next best action recommendation**
- Campaign **effectiveness measurement**
- **Microsegmentation** of Customer groups
- **Optimal personalisation** for each Micro Segment
- **What If** scenarios
- **Causality** understanding

## Outcomes

- Optimal sales funnel
- Reduction in Churn rate
- Increased Customer LTV
- Enable Cross sell and Up sell
- Target the **right customer**, at the **right time**, through the **right campaign**, with the **right product & strategy**.

# A Day in the life of CMO

# Data Context for Scaling the Solution: Hospitality illustrative

## Must Have

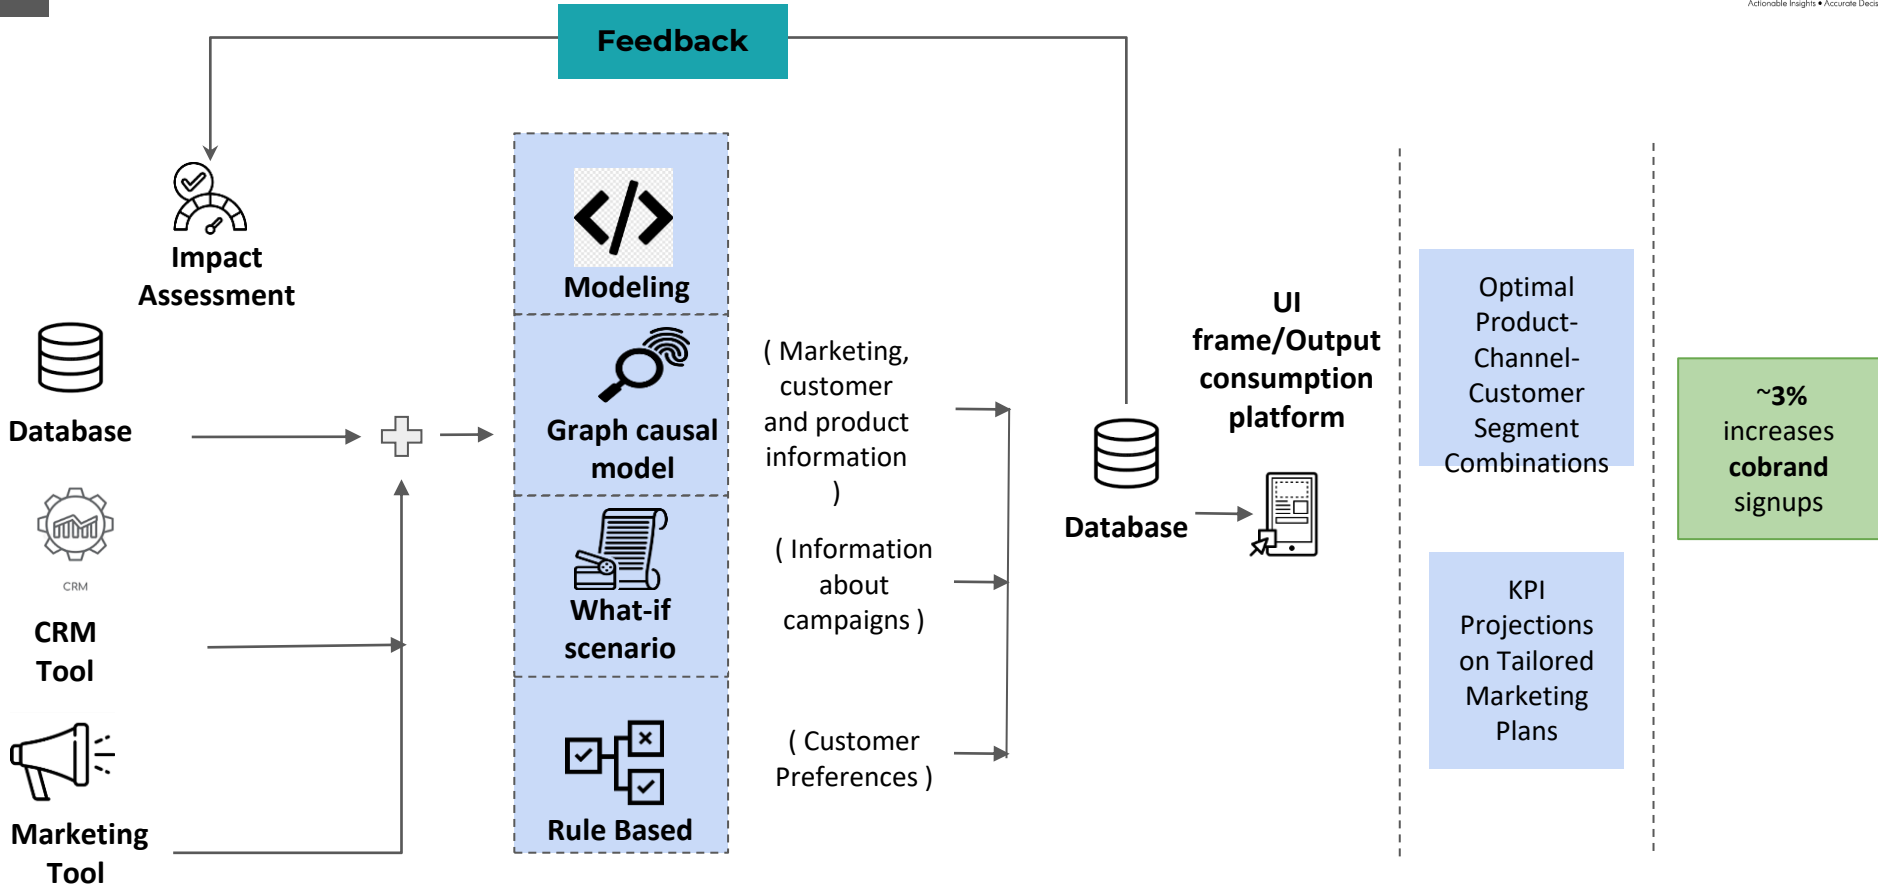

Confounders	Treatment	Heterogeneity Index	Outcome
Customer behaviour ✓	Emails ✓	Customer income ✓	Bookings ✓
Purchase pattern ✓	Phone calls ✓	Marital status ✓	Stays ✓
Preferred brand ✓	Push notifications ✓	Years of Engagement ✓	Points earned ✓
Services ✓	Offers ✓	Partnership Enrolments ✓	Spend ✓

## Good to Have

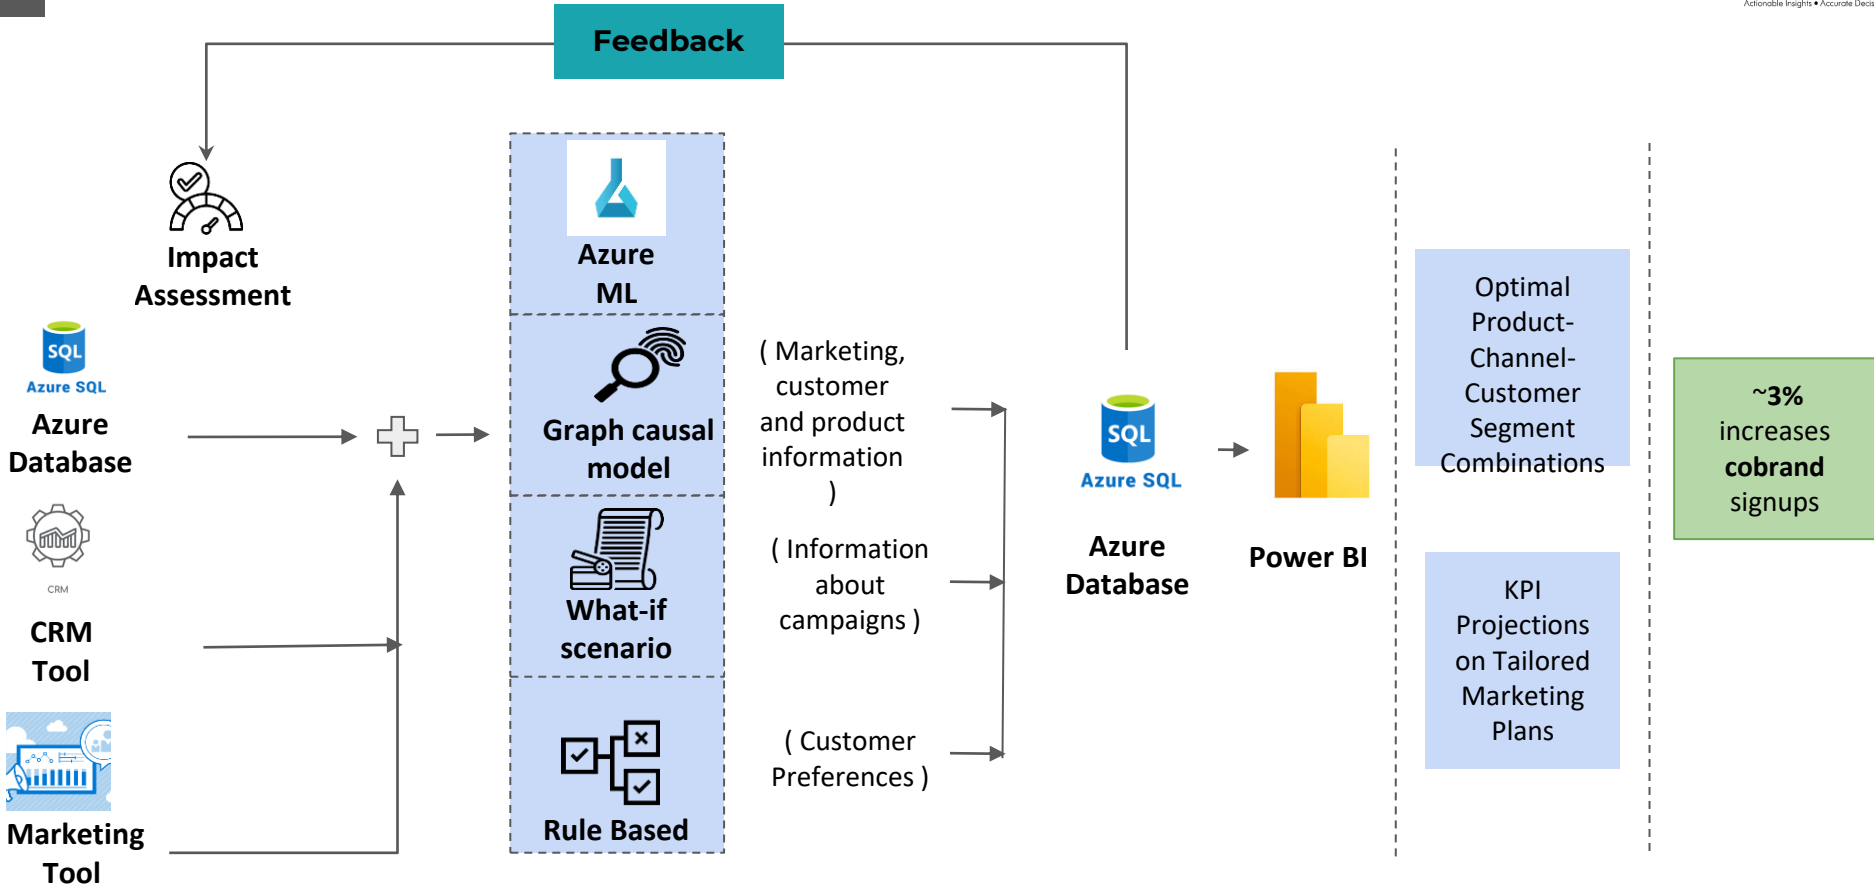

Confounders	Treatment	Heterogeneity Index
Demographics ✗	Messaging across channel ✗	Demographics ✗
Customer Social media ✗	Number of Dependents ✓	Business traveller ✓
Customer stay in competitor Brands ✗	Occupation ✗	Leisure traveller ✓
