

# The Laundris Difference!

Hotel/Property

## Track Linen Inventory Throughout Your Supply Chain

Precisely tracks all linen movement throughout your supply chain using embedded RFID tags

## Efficiently Manage Your Supply Chain and Operations

Produces a replenishment and laundry plan used to negotiate with and collaborate with all supply chain and operations partners

## Improve Budget Management

Updates week-over-week projected budget needs for linen procurement, laundry costs, and labor costs to efficiently manage operational budgets

## Reduce Theft and Shrinkage

Precisely identifies discrepancies between expected item inventory levels and actual inventory levels by inventory location

## Optimize Linen Inventory Levels

Calculates ideal PAR levels for each individual linen item which in-turn is used to drive optimal auto-replenishment plans

## Minimize Housekeeping Labor Costs

Forecasts daily turnovers, departures and linen service needs by room type leveraged to develop precision labor plans
