

## **MEASURING NEEDS ANALYSIS**

LP+ OASIS is a web-based diagnostic tool that provides individual schools, groups of schools or Ministry of Educations (MoE) an opportunity to accurately assess their digital status and readiness through surveying all stakeholders. It is quick and easy to use, and produces detailed reports showing strengths, weaknesses, priority areas and action plans.

LP+ OASIS is based on well-established European quality assurance systems, such as EFQM at an institutional level, and SELFIE in respect of eLearning. These systematic processes are based upon rigorous self-review, evaluation and action planning involving all stakeholders in an organisation.

## **FEATURES**

LP+ Oasis product is fully customizable to suit the school or MOE. LP+ Oasis consists of four questionnaires, surveying a targeted audience in any language. They focus on the four critical areas of: • Infrastructure

- Infrastructure
- Teaching & Learning
- Training and Skills Development
- Leadership and Policymaking

The questions offer a structure and starting point, with flexibility so they can be changed to meet local needs. The surveys are accessible from any device including mobiles and tablets, regardless of bandwidth.

The results are published in both a PDF report and an interactive digital reporting tool, allowing more detailed report analysis.

**SURVEYS:** The surveys have a simple and intuitive user interface that is accessible across all devices – smartphones, tablets and PC's. With a selection of languages and multiple question and answer types available, participants can respond easily to the online survey.

**REPORTING:** Results are aggregated, analysed and presented to the school, the district or the MoE, in an easy-to-read PDF document and on a digital dashboard, allowing further interrogation.

**OUTCOMES:** The results from the LP+ OASIS survey can be used to see strengths and weaknesses, track progress, provide an action plan or identify areas for intervention.
