FINQuery™
Formerly LeaseQuery

One **platform** for your clients' largest areas of **spend.**

LeaseQuery
Powered by FinQuery

LeaseQuery powered by FinQuery is the proven leader to maintain compliance with the lease accounting standards. LeaseQuery simplifies complex accounting and helps your clients maximize the value of their leases with critical date alerts and more.

FINQuery™ | Contract Management

FinQuery Contract Management is a searchable central repository with contract abstracts including payment info, critical date alerts, cash flow forecasting, and more – eliminating surprise renewals and giving your clients better metrics to manage.

FINQuery™ | Software Management

FinQuery Software Management is software asset management without the ITSM costs. Implement quickly and see rapid returns with the visibility and tools you need to optimize software usage, costs, and security.

LEASE CONTRACTS

VENDOR & FINANCIAL CONTRACTS

SOFTWARE CONTRACTS

FINQuery™

Contract & Spend Intelligence built to unite Finance, Accounting, & IT.

Help your clients take control of their contracts with a top-rated ISV

LeaseQuery
Powered by FinQuery

The leader in lease accounting for three years running

Mandatory Compliance
LeaseQuery simplifies accounting for leased assets and SBITAs to facilitate mandatory compliance with ASC 842, IFRS 16, GASB 87 & 96, and SFFAS 54.

Financial Insights
Housing all of an organization's leases in one solution improves data visibility, streamlines processes, and provides significant cost savings insights beyond compliance.

Operational Efficiency
AI-assisted lease entry, automated alerts, and audit trails save time and allow you to account for your leases with accuracy and simplicity.

FinQuery™
Contract Management

AI-enabled, post-signature contract management designed with Finance and IT in mind

Easy Contract Entry
Our AI makes contract entry quick and easy, abstracting key data for analysis and reporting.

Simple Budgeting & Forecasting
A central repository gives your clients full visibility into their upcoming payments for efficient and accurate budgeting and forecasting.

No More Surprises
Automated alerts keep their team on top of important dates to proactively manage their largest areas of spend.

FinQuery™
Software Management

SaaS Native Software Asset Management for visibility and control without the ITSM cost

Software Discovery
Improve usage visibility across your clients' ecosystem to uncover shadow IT, duplicate software, zombie subscriptions, and more with our powerful integrations and comprehensive dashboard.

Software Catalog for Employees
They'll be able to tackle software sprawl by utilizing the software catalog to provide employees with a centralized and convenient place to request access to approved software.

Employee Offboarding
Automatically remove employees from integrated software for easy license reclamation and see exactly where to remove loose-end access.
