

FinQuery Contract Management

See the most where you spend the most

Unprecedented visibility into the contracts driving your largest areas of spend.

Core Features

AI-ENABLED

Load and enter contracts with an AI-enabled interface

REPORTS

Get summary reports and cash flow forecasts with the click of a mouse

AUTOMATED ALERTS

Receive automated alerts for key contract dates and options

CENTRAL REPOSITORY

One place for financial contracts including SaaS, utility, insurance, vendors, and others

INSTANT ACCESS

Contract dashboard and simple search put the contract you need at your fingertips

FULL AUDIT TRAIL

Make comments on or change to a contract with a full audit trail

Tasks like budgeting and cash flow forecasting are needlessly complex if finance doesn't have visibility into contracts. FinQuery Contract Management is purpose-built to provide insight and intelligence into all your financial contracts.

Financial Contract Management Starts at the Signature

FinQuery Contract Management covers the gap for contracts that commit your company to large or recurring payments such as:

- Software
- Services
- Utilities
- Insurance
- Leases (including short-term and immaterial)

Our solution is designed specifically for financial contract management with features that save you time and reduce your company's costs by providing valuable control and insights over where your money is going.

Key Benefits

EASY CONTRACT ENTRY

Our AI makes contract entry quick and easy, abstracting key data for analysis and reporting.

ACCURATE BUDGETING AND FORECASTING

A central repository gives you full visibility of upcoming payments for efficient and accurate forecasting and budgeting.

PROACTIVE CONTRACT MANAGEMENT

Automated alerts keep your team on top of important dates and proactively manage your largest areas of spend.
