Use-Case Example: The RAG-Enabled Knowledge Navigator

Companies struggle with inefficient search methods that fail to precisely identify and extract relevant information from the data deluge, leading to time loss and decision-making uncertainty.

| > 5 h	-17%	81%
Employees spend 5 hours per week searching for internal and external information.	Loss of productivity due to searching for internal and external information	of the employees are frustrated/ overwhelmed with the acquisition of knowledge

The RAG-Enabled Knowledge Navigator

Unlock your enterprise's full potential with MyGPT, the scalable and GDPR-compliant platform revolutionizing knowledge discovery.

MyGPT leverages Retrieval Augmented Generation (RAG) to integrate real-time data retrieval with advanced language model intelligence, transforming vast information streams into actionable insights.

Highlights of MyGPT:

> Independent & Secure: A stand-alone platform that guarantees data privacy.
> Seamless Connectivity: Connects effortlessly with various data systems and enterprise software.
> Advanced Search: Employs robust algorithms for quick and relevant information retrieval.
> Smart Synthesis: Collaborates with leading LLMs to deliver precise and context-aware responses.
> Customizable & User-Centric: Adapts to enterprise-specific needs, enhancing efficiency and decision-making.

MyGPT isn't just a platform, it's your enterprise's next competitive edge.

Leftshift One

Sophisticated Retrieval: At the heart of our Enterprise
Search, MyGPT leverages advanced algorithms to dive deep into the company's internal and external information reservoirs, fetching relevant knowledge swiftly and accurately.

Eliminates Hallucinations
The RAG System always cites the source of the information derived from company knowledge.

Provider Independence:
Independent from Large Language Models (LLM) and cloud providers, enhancing system integrity.

Rapid Integration & Easy to Expand
Allows customers to quickly and easily customize the system with plugins and connectors to include company data and highly specialized use cases.

AI-Supported Analytics:
Provides actionable insights by understanding corporate communication and knowledge.

Fully GDPR compliant & EU AI Act ready
High Security Standards: Operates with the highest security standards, ensuring data sovereignty remains with the customer

Empower your team with MyGPT:
Boost productivity by **37%**!

Unlocking Company Knowledge at the Speed of Thought
