

## **POA by Legalcluster**

Manage your power of attorney and secure your organization and your employees 2024

## Legal**cluster** 🔆

Poor management of chains of POA exposes your employees and your organization to major risks:

- Civil and criminal risks: in the absence of a valid delegation, the associated liability becomes uncertain and remains ultimately attached to the company manager
- Financial and business risks: The people who hire the company do not have the power to do so. Contracts can be called into question, unless the apparent mandate is opposed to you...

However, the more sophisticated and scalable your organization is, the more complex and tedious the management of your chains of delegation becomes, involving a growing number of stakeholders.

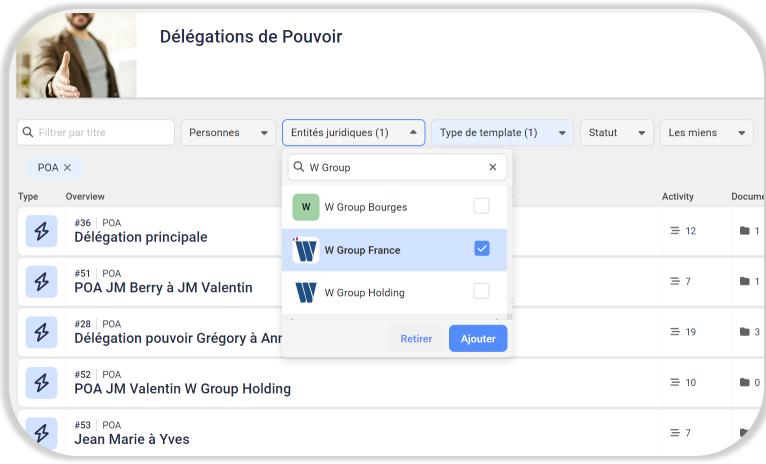

## With "POA by Legalcluster"

- Make your employees' lives easier by giving them more autonomy
- Create your delegations easily from your organization repositories and document templates
- Centralize validation and signing workflows and processes
- Manage your delegation chains
- ✓ Centralize data
- ✓ Share data with those who need it
- Ensuring data management at a strategic level

## Explore view makes it easy to find a POA effortlessly

Filters at the top of the page allow for a very quick and more enjoyable targeted search than a search in a data table

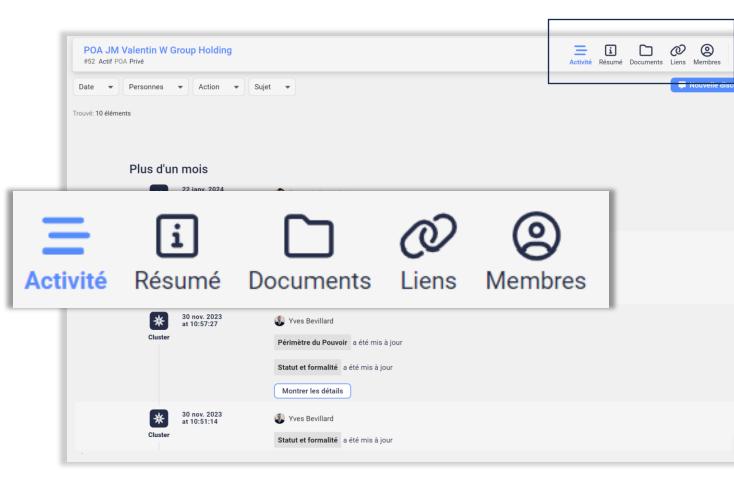

## Each delegation is managed in a collaborative space called a "cluster"

#### A cluster is defined by:

- **1 activity wall** allowing the traceability of all the activities carried out as well as the interactions between users
- **1 data structure** specific to the cluster's theme to collect business data
- 1 shared document space
- **Services** such as alerts, approval services, e-signature, etc.
- 1 section of useful links dedicated to the cluster
- 1 community of users with defined access rights (owner/member/guest)

## The cluster "summary" is used to structure the data of the delegation

## Legalcluster offers an in-depth data structure that adapts to your organization

Parties involved Powers Area of responsibility Object Organizational repository (Country, BU, etc.) Financial limit Level of delegation Sub-delegation possibleDates Status and formalities Status Apostille Associated Delegation Comment

The cluster has a document service that is based on Microsoft standards for shared directory and document editing

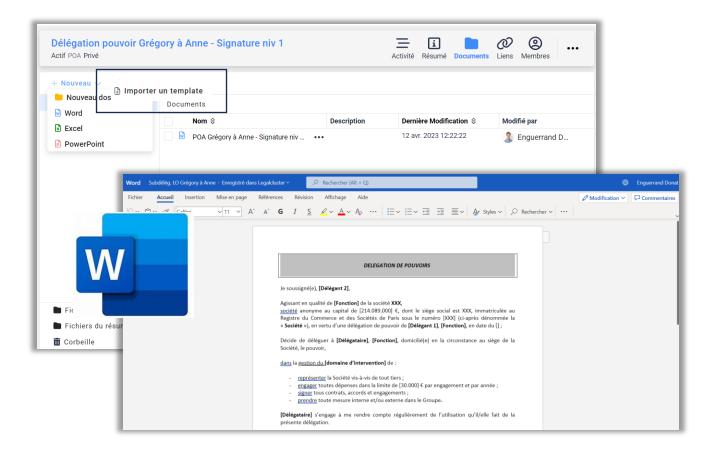

You can create a new document according to 3 use cases:

New document

Importing a template

Importing an existing document into another cluster

As a Microsoft partner, you have the possibility to activate the Word Online option to edit your POAs directly from our platform. Lawyers don't want to leave Word!

You can combine an automatic document generation service to speed up the creation of your delegations (option)

We are able to offer several automatic delegation generation experiences to respond even more precisely to our customers' challenges.

# The Dashboard view presents your delegation register up-to-date, in real time

The dashboard presents all the data entered in the clusters of the POA module

The dashboard is updated in real time

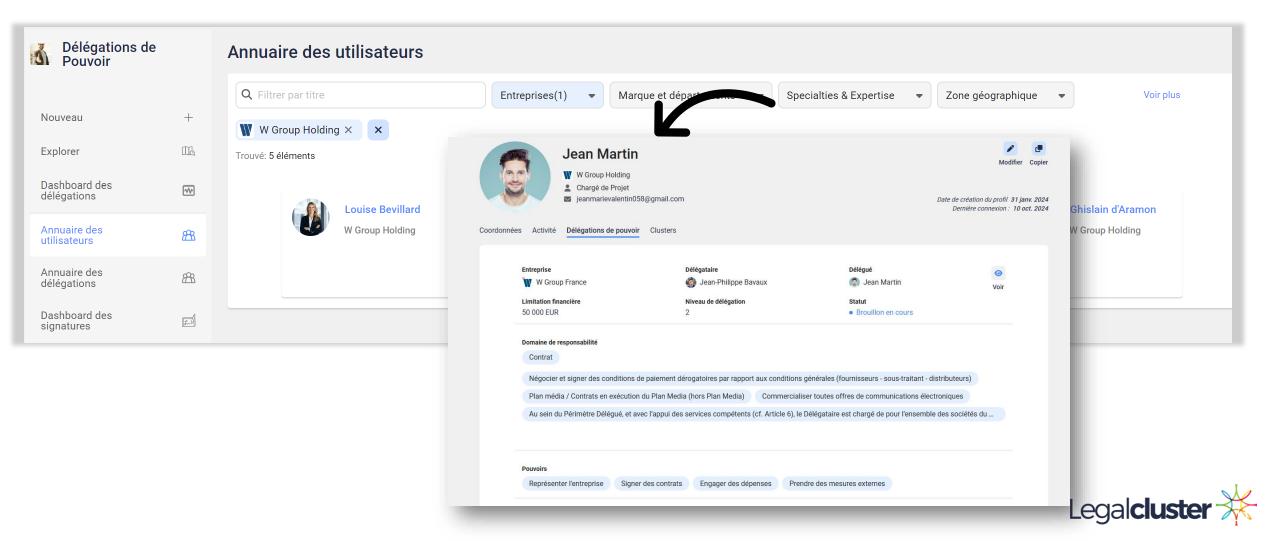

The dashboard view is personal:

- The user sees the clusters based on their permissions
- The user can choose which columns they want to show or hide
- All users can export their dash-board in Excel or CSV format

## Manage your approval process from the cluster with our dedicated service

#### Use the approval service to streamline your process and make life easier for those in charge. Our approval service includes the following features:

- for approval, opinion, information
- Prioritization of flows
- Prioritization of flows
- Historization of flows in the activity wall
- Related messaging
- + Ability to automate approval workflows with the rules engine (advanced feature).

## Manage your signing process with our Docusign API

## Use the signature service to streamline your process and make life easier for those in charge.

Our Docusign API allows you to mobilize your Docusign subscription to operate the process from the space dedicated to your delegation.

The advantage? A smooth experience and the document once signed that automatically returns to its cluster!

## The Settings view makes it easy to manage your users' access and their associated permission level

# The tree view allows you to trace the chain of power in the form of an interactive flowchart (Q2 2025)

This feature already exists for our Corporate module and will be extended and adapted to meet the POA theme

Delivery is scheduled for Q2 2025
