

Proof of Concept

If you are considering moving to a hyperscale Cloud, then Lemongrass can help. With a Proof of Concept (PoC), our team will collaboratively work with your organization to address any key concerns you may have and mitigate any risks identified. Most common concerns are around how the Cloud platform will work with existing system configurations, performance concerns if there is a large database, and whether the system will remain secure once migrated and continue to meet all compliance requirements.

How We Do It

During a Proof of Concept, our team will demonstrate the agility of a hyperscale Cloud solution, giving you the opportunity to see just how quickly you can build, shut down and delete a system. We want you to be 100% confident in Lemongrass's capabilities and expertise before you transition your SAP systems to the Cloud.

From start to finish, a PoC can take between two and four weeks, depending on the complexity of the system and the scope of work. In addition, to further support your migration to the Cloud, Lemongrass may be able to help your organization offset the cost of a PoC through our Partner Funding Programs.

About Lemongrass

Lemongrass is a software-enabled services provider, synonymous with SAP on Cloud, focused on delivering superior, highly automated Managed Services to Enterprise customers. Our customers span multiple verticals and geographies across the Americas, EMEA and APAC.
