## Azure Backup Overview

### Prevention

### Alerting

### Recovery

Azure backup retains deleted backup data for 14 days ensuring recovery using any old or recent recovery points

**Azure Backup is the service that you use to back up and restore your data in the Microsoft cloud.** It replaces your existing on-premises or off-site backup solution with a cloud-based solution that is reliable, secure, and cost-competitive. It also helps protect assets that run in the cloud.

**Azure Backup** provides security capabilities to protect cloud backups. These security features ensure that customers are able to **secure their backups and recover data using cloud backups if production and backup servers are compromised.**
