Lenovo Cyber Resiliency as a Service (CRaaS)

Cyber resiliency, simplified

Stay ahead of cyber threats with one global team and one managed service.

Now that's smarter.

Smarter technology for all

Lenovo

Simplify for peace of mind

Cyber threats just keep on coming. Their numbers are growing, their threat levels are more damaging with the use of AI, and their complexity is increasing massively. The average organization now encounters hundreds of cyberattack signals every single second.[1]

Threat landscape is escalating
4,000 attacks per second
The estimated number of password attacks in 2023[2]

Add in the increase in ransomware attacks with cryptocurrency payments for anonymity, and life isn't getting any simpler. Or less expensive.

Costs are skyrocketing
$410.5 trillion
The cost of cyber crime is expected to top $410.5 trillion by 2025[3]

As ever, it's the front line that's really feeling it. IT departments are under pressure, under resourced, and overwhelmed. Especially given the surge in cyber threats since the onset of COVID-19.

Talent is scarce
4 million
Global cybersecurity talent shortage remains at more than 4 million people[4]

As if this landscape isn't complicated enough, it's made even more alarming by the vulnerabilities that accompany today's growing use of personal devices, rising reliance on home networks, and the continuing shift toward hybrid working.

It's time to conquer complexity

As IT environments get more intricate, organizations are struggling.

How can you defend against an ever-increasing variety of attacks? How can you address all the vulnerabilities and gaps, while simultaneously managing multiple vendors to safeguard your data?

It's a tough balance. Or used to be.

Why get lost in complexity? Find simplicity with Lenovo.

Cyber Resiliency as a Service (CRaaS), our new Gen AI-powered offering, is a comprehensive, global, end-to-end, managed service to help you stay ahead of cybersecurity threats.

Our managed service takes the burden off your IT teams – strengthened by our alliance with Microsoft Security Copilot. You gain everything you need to ward off threats, and the freedom to ensure nothing gets in the way of your business vision.

Time for smarter cyber resiliency with Lenovo.

Stay ahead without the stress

Cutting through complexity, Lenovo Cyber Resiliency as a Service leverages Gen AI and managed services to simplify the enterprise security ecosystem.

Our solution is strengthened by Microsoft Security Copilot, the first AI-driven security product that enables security professionals to respond to threats quickly, process signals at machine speed, and assess risk exposure in minutes.

And by combining the full power of the Microsoft security stack with Lenovo's fully managed services, we provide end-to-end security through an as-a-Service consumption model, closing any gaps that could expose vulnerabilities. The resource and time efficiencies this brings means you can free up your teams to focus on strategy and innovation, while also reducing your overhead costs.

Future-proofed protection, today.

Easier management with support of global experts
Lenovo builds on the Microsoft Security Alliance to deliver seamless cyber resiliency and fill cybersecurity skills gaps.

Fully scalable to drive productivity
Service model can adapt whenever needed to support your evolving organization and drive your growth.

Always on and ready to respond
We offer the most comprehensive managed cyber resiliency solution – integrating industry-leading security tools to respond to a spectrum of threats fast.

Count on our reliable support

Expertise and learnings from global leaders
Expertly managed by the world's #1 PC manufacturer in alliance with Microsoft, we share learnings to respond to global threats in real time.

Constant compliance and updates
We manage all security and compliance updates as regulations change – so you're always protected and future-proofed.

Keeping you one step ahead
Be confident in your ability to protect productivity with our AI, automated safeguards and leading industry expertise.

CRaaS delivers 360-degree resiliency

Lenovo Cyber Resiliency as a Service covers every part of the NIST Cybersecurity Framework, ensuring end-to-end cyber protection for your organization.
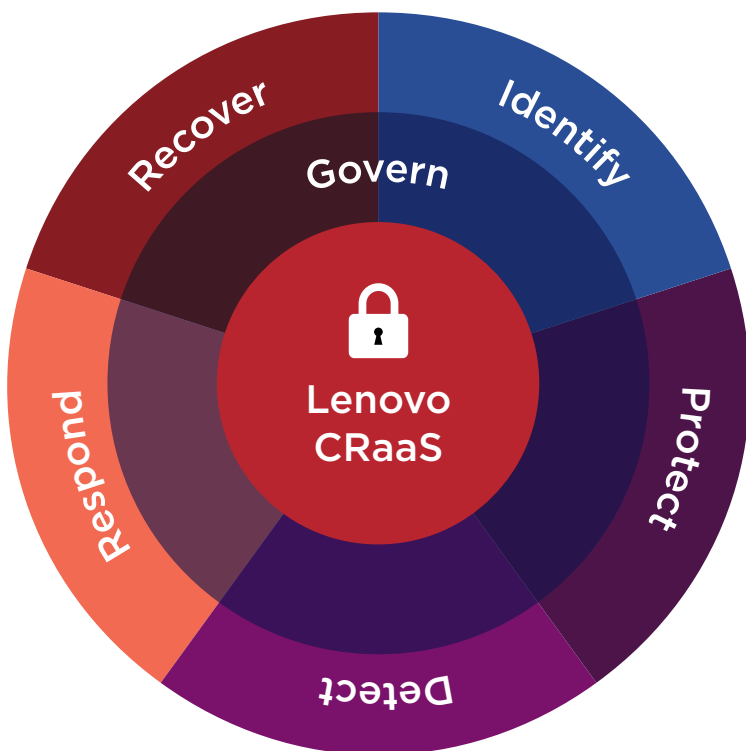

Your managed service choices:

■ **Access & Trust Management**
Managed IAM & Privileged Access

■ **Digital Data Protection**
Data Protection & Privacy Services
(Zero-knowledge Proof)

■ **Cyber Detection & Response**
Managed eXtended Detection & Response
SOC-as-a-Service

■ **Lenovo Incident Response Service**
Initial incident assessment

■ **Visibility & Risk Management**
Cyber Readiness Assessment

■ **Compliance Management**
3rd Party Risk Management

Five services for **simplified** cyber resiliency

With Lenovo by your side, you can take the fast track to simplified cyber resiliency. You'll be supported by our managed services, global experts and best-in-class security technology in alliance with Microsoft.

We can assess your vulnerabilities, determine the right services for you and, ultimately, drive superior outcomes.

Your managed service choices:

Access and Trust Management

- Managed Identity and Access Management (IAM) & Privileged Access
- ZTNA (Zero-trust network access) Cloud Access Security Broker
- Secure access Service edge
- Secure cloud gateway

Digital Data Protection

- Data protection & privacy services (zero-knowledge proof)
- Email and messaging security
- Encryption Services
- Data masking
- Data security analytics

Cyber Detection and Response

- Managed detection & response
- SOC-as-a-Service
- Incident response services

Visibility and Risk Management

- Cyber-readiness assessment
- Inventory & asset discovery
- Vulnerability management
- Application security testing
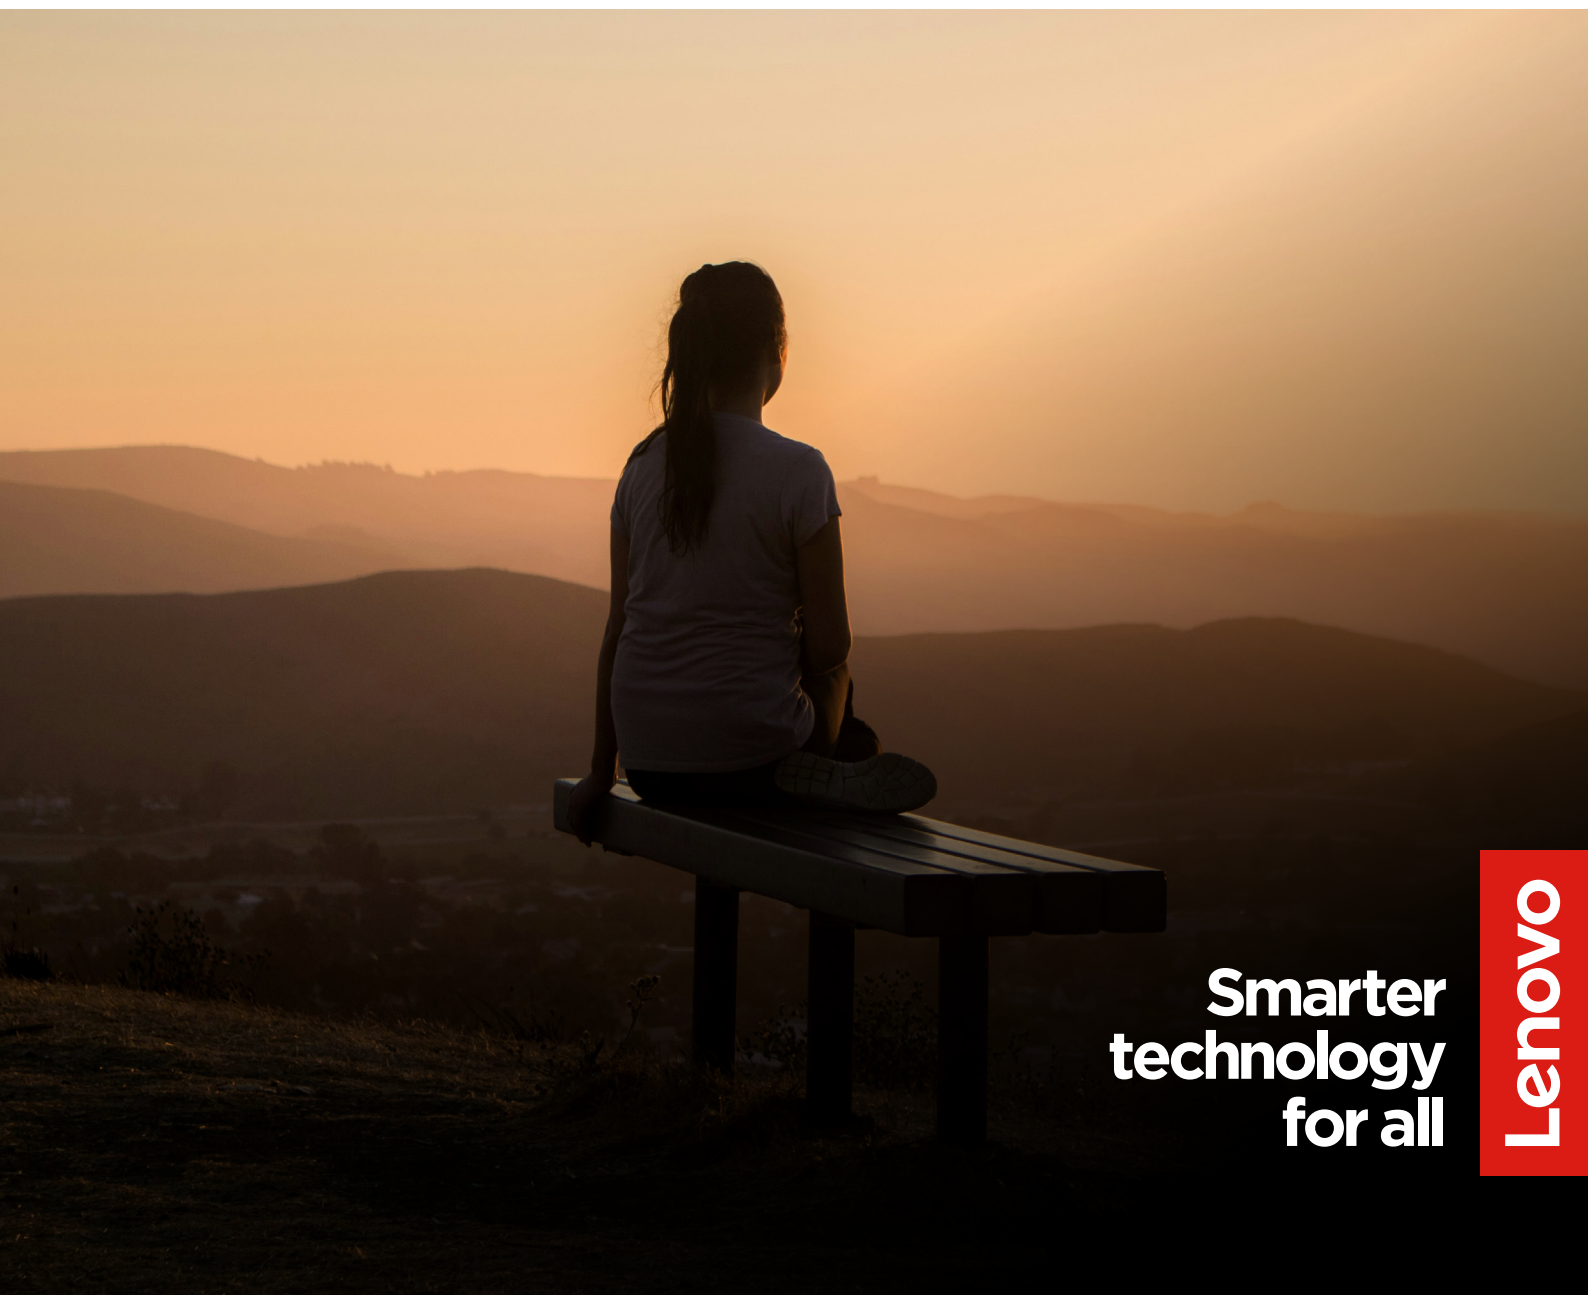

Compliance Management

- Third-party risk management
- Governance risk and Compliance-as-a-Service
- Regulatory compliance
- Cyber-coverage services

The vision is yours.

Get there with Lenovo.

Ready to build the best protection for your business and free your IT teams? Let Lenovo be your cybersecurity managed services partner with CRaaS and empower your business continuity.
