ABOUT US

WHO WE ARE

LeverBot is an genAI-powered platform designed to revolutionize customer engagement. By offering fully customizable, no-code chatbots, LeverBot empowers businesses to automate interactions, provide real-time assistance, and gather valuable customer insights. Our solution is built to integrate seamlessly with existing systems, ensuring a smooth transition to genAI-enhanced customer service.

MISSION

LeverBot's mission is to empower businesses with cutting-edge AI-driven chatbot solutions that enhance customer engagement, streamline operations, and provide valuable insights. We aim to make advanced technology accessible to all, enabling businesses to deliver exceptional customer service with ease and efficiency.

Vision

Our vision is to revolutionize customer interaction by becoming the leading provider of customizable, no-code genAI chatbots. We envision a future where every business, regardless of size, can harness the power of genAI to create seamless, personalized customer experiences that drive growth and loyalty.

ABDULLAH KARASAN

Founder

Abdullah Karasan holds a master's degree in Applied Economics from the University of Michigan, Ann Arbor, and a PhD in Financial Mathematics from Middle East Technical University. He worked at the Treasury for nearly 10 years and served as a data science mentor at Thinkful and Springboard. Following his consultancy roles at Vodafone, TFI-TAB Foods, and three different US-based startups, he founded Leveragai and currently serves as an adjunct faculty member at UMBC. His research and publications in financial data science are well-regarded, and his book, "Machine Learning for Financial Risk Management with Python," has been published by O'Reilly.
