

IDENTIFY OPPORTUNITIES AND IMPROVE OUTCOMES

Lightbeam's proven population health management solutions and services enable you to identify strategic objectives, creating specific interventions backed by data to increase operational workflows that match established benchmarks, even as those objectives evolve.

Identify and engage opportunities to improve outcomes within your member population

Lightbeam provides the capabilities health-care organizations need to drive improvements in health, outcomes, and spending. We combine everything from clinical and claims data to biometric and social data in a single location, making it simple to maximize revenue and reduce the future cost of care.

We provide insights to identify those who need immediate action and the services to manage your high-risk and rising risk cohorts. The Lightbeam platform gives you the flexibility to create custom dashboards, track performance over time, and learn where you can improve.

Executive Summary

Informs executives where they're performing well and where potential problems exist by contract, provider or business unit

Executive Opportunity Manager

Actionable insights for executives on clinical interventions with predicted financial outcomes

Opportunity Summary

Insights to inform providers of opportunities to improve patient outcomes, spending, and quality

Opportunity Analysis

Finance and utilization trending informs all parties on how the interventions are changing outcomes

LIGHTBEAM'S PAYER SOLUTIONS ENHANCE PAYER-PROVIDER ALIGNMENT

Lightbeam's Payer Solutions support nearly 10 million members across all 50 states.

IRVING, TX – JULY 13, 2021 – Lightbeam Health Solutions, the leader in end-to-end population health management solutions and services, announced new enhancements to its suite of payer solutions, which facilitate information sharing and improve transparency under value-based contracts.

Payers face many challenges, but perhaps none more than provider engagement. Lightbeam's solutions for health plans enable payer-provider information sharing and alignment in key areas like HEDIS and Star quality measures, risk adjustment coding, and cost and utilization patterns. With better information, providers are able to focus on treating their patients and delivering the right care at the right time.

Lightbeam's payer organizations rely on the application to provide:

- Increased provider alignment, engagement, and satisfaction
- Two-way information sharing
- Improved utilization and quality scores
- Simplified bonus and compensation reporting
- Peer vs. peer comparisons and other benchmarking

"Within the first three weeks of implementation, one payer had over 1,000 unique logins from their provider base, closed over 20,000 care gaps, and added over 22,000 supplemental data elements," said Lightbeam CEO Pat Cline. "We have come so far in the payer space in a short amount of time, and we will continue to invest in solutions that help providers, payers, and employers drive performance."
