Embarking 60 Ops people and 20 managers on a DevOps training program

Adeo

Adeo, No. 1 in Europe and No. 3 worldwide in the DIY market, established a DevOps initiative to solve lack of automation, complex processes and disparity quality in the delivery.

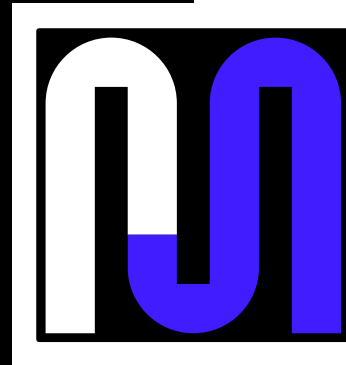

Expectations:

- New delivery model
- Acquire and implement new skills through training programs
- Have the code back in the center of the daily activity

DevOps

Boost People

Agile Change

Our approach & results

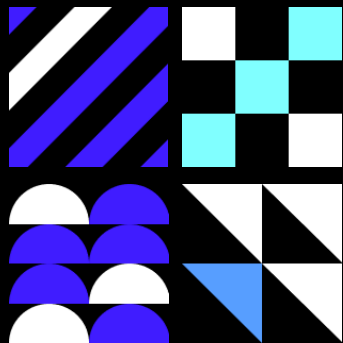

3 steps project:

- Factory: Design and Setup an IP coding factory. CI/CD, norms, language and development engineering.
- Methodology: Trainings and HR, Managers & employees advisory
 - Technical & Manager trainings preparation
 - Streams set-up and organization
 - Practical use cases within a Squad: rituals SCRUM, peer programming, testing and demos
 - HR advisory: onboarding, co-design of trainings, promotion of development activity, help on the update of assignment record sheet and skills base
 - Satisfaction survey after each training session
- Promotion: Communication & marketing of approach to Executives, BUs and external

KPI's and results:

- 100% employees have been trained within 20 days
- Each product of the Digital Tech Platform had to showcase at least 1 service after training
- Any internal tool had to be showcased as a API service
- API creation process had to be standardised and available
- API development process has been updated with automation and continuous improvement
- 15 months task-force after first training session to accelerate delivery
