

## We help you identify the most efficient ways to **automate** your business.

Assessing your processes and creating a detailed step-by-step automation implementation program.

We help you discover and build implementation solutions for **business process automation** using Microsoft's Power Automate Platform

From taking a look at your current business flows to providing a step-by-step automation plan in just **1 week**. Our assessment services are designed both for helping businesses at the start of their automation journey, but also for those in search of the next optimization opportunity

What you can expect from this service:

- **State Review and Requirements Definition**- We analyze your business in detail and assess the most ROI-efficient automation opportunities. We also take a look at your current automation technical readiness.
- **Mirror analysis on AS-IS processes and the automated process**- We take your processes and put them side-by-side with their automated versions in order to give you a detailed picture of how automation can help your business.
- **Solution description for implementation** - After the analysis is complete we provide a detailed implementation program

Prices vary based on the complexity of your business and the number of processes to be analyzed. Contact us for a detailed quotation.
