

Azure Architecture Workshop

Access detailed guidance on the most cost-effective and appropriate architecture strategy for your business

Linktech Australia's Architecture Workshop is a flexible engagement, designed to clarify business goals and provide personalised, experience-based guidance to help businesses transform infrastructure in Azure. Throughout this process, business leaders can reduce the time needed to make strategic technology decisions, uncovering their true priorities and identifying the business benefits of future investments in technology. Risks of project failure is reduced, as technical teams are also provided with detailed design guidance.

Workshop Scope

Our consulting team bring strategic planning and design skills to each engagement, complementing an organisation's existing operational knowledge. The Architecture Workshop is flexible once business goals are defined.

Example Agenda

Understand the existing solution design

- Motivations for modernisation
- What business function does the solution support?
- Where are the integration points?
- Are there any upstream or downstream dependencies?
- What technologies are being used?
- When are the usage peaks and troughs?

Discuss the future solution requirements and constraints

- Functional requirements
- Non-functional requirements
- Constraints
- Assumptions

Outline a future solution design

- Design decisions
- Outline a candidate set of future solution designs
- Outline a recommended future solution design that will be carried forward

Outline a high-level migration plan

- What migration method is most appropriate?
- How long is the outage window?
- When can the migration take place (evenings, weekends)?

Close-out and replay

- Requirements
- Constraints
- Assumptions
- Design decisions

After this engagement you will receive a detailed report containing our strategic recommendations and guidance.

Why Linktech Australia

With extensive solution development experience, we can help you envision your desired state — one that brings people, data, and applications together. Our team will work with you to understand your priorities, challenges, and culture to design a solution that meet your needs. With industry and technology experience across cloud, security, and mobility. You can count on us as your trusted partner in your transformation journey.
