AD FS to Azure AD

Business Outcome

- Common Username and Password
- Same MFA setting used for access to applications
- Same security profiles used for piece of mind
- Audit and Logging in a common area and integration

Assess what is configured today

Investigate which option is best fit per application

User experience

- **Azure AD used**
- Azure AD MFA used
- Azure AD Conditional Access used
- Same logon used
- Same look and feel
- Common security profile

End Result

- AD FS can be decommissioned
- Less on-premises infrastructure needed
- Scalable and Secure

- Same logon used
- Same look and feel
- Common security profile

End Result

- Same identity and logon
- Low administrative effort
- AD FS can be decommissioned
- Less on-premises infrastructure needed
- Scalable and Secure

Lnktech Australia

WHAT OUR CUSTOMERS SAY

Essendon Football Club sought the assistance of Linktech Australia in order to perform upgrades on our VMware environment. We found them to be extremely capable and efficient. Mark knew exactly what he was doing and everything went without a hitch despite the complexity of the environment.

I would recommend Linktech to any organisation looking for an IT provider that is reliable and knowledgeable.

John Edmonds at **Essendon Football Club**

Independent Pricing and Regulatory Tribunal engaged Linktech Australia to assist us with our Office Relocation and Data Centre move. We use Linktech in a number of capacities throughout our IT department including , Service Desk, Project Services and Consulting. Linktech constantly meet project rollout schedules and their team of Project Managers and engineers are outstanding. Communications between Linktech and IPART is excellent as we are always on the same page.

Sonny Bow (Networks Infrastructure Manager) at Independent Pricing and Regulatory Tribunal NSW

VRL engaged Linktech to lead a technical program of work, uplifting our I&AM and Mobility capability using the latest Microsoft Cloud services. Linktech were not only able to deliver on time and under budget, but find opportunity to optimise other facets of our configuration and infrastructure mid-project. Regina and Ian were with us every step of the way, and their communication and support have been key to our success.
Linktech are now one of our most trusted IT suppliers, and continue to support both projects and our operational teams.

Rob Marathakis (Lead IT Architect) at **Village Roadshow Limited**

We are enjoying a superior level of assistance from your engineers and solving complex problems. Simon is looking after our needs and we love working with him as he really understands our needs and has real customer service delivery values, we have much more to do together.

Tony Bearzatto at **WorkSafe Vic**

Linktech Australia is committed to providing the best solutions that fit within your budget
and provide the best performance possible.

Thank you for your time!
