

LITERA DRAFT ADVANCED

Enterprise End-to-End Drafting in M365 with Agentic AI

Draft Advanced is a drafting platform for the whole firm—associates, partners, IT, and document specialists. Built on Litera One and powered by Litera AI+, it unifies workflows, automates legal tasks, and boosts productivity across Word, Outlook, and browser.

With Lito, your AI Legal Agent built on 30 years of experience, Draft Advanced automates documents from draft to final PDF, mitigates risk, and guides teams through drafting, review, negotiation, and knowledge management—delivering faster, more accurate, and strategic results.

Why Draft Advanced?

Litera Draft Advanced is your enterprise all-in-one drafting powerhouse. For associates and document specialists, Draft Advanced turns Word, Outlook, and the browser into a seamless legal workspace to accelerate drafting, review, formatting, and negotiation—all while maintaining context.

For IT teams, Draft Advanced replaces fragmented point solutions with one modern, cloud-ready experience, reduces overhead with fewer add-ins to manage, supports cloud and on-prem deployment, lets you toggle AI in line with firm policy, and provides enterprise-grade security and governance—all powered by legal AI and embedded in M365.

Unify Legal Workflows

Bring every drafting workflow—**from first draft to final PDF**—into a single, intuitive experience with agentic AI

IT-Friendly, Future Ready

Deploy in the cloud and on-premises, toggle AI on or off, and reduce costs with simplified updates and maintenance

Work Anywhere Without Disruption

Empower lawyers to work wherever they are—in Word, Outlook, or the browser—across PCs or Macs, delivering AI-powered workflows directly into their native experiences

Key Features

- ✓ **Agentic AI Workflows with Lito**
Leverage a skilled legal AI agent that orchestrates the right capabilities to deliver context-aware outcomes in Outlook and Web
- ✓ **Document Templates**
Leverage enterprise-approved templates to quickly initiate first drafts
- ✓ **Content Library**
Centralize knowledge into an enterprise repository with the ability to curate practice group and individual content libraries, and insert language into documents with one click
- ✓ **Comparison and Redlining**
Compare multiple document formats in Word, Outlook, and Web for any scenario – 1:1 or in bulk – and get detailed redlines
- ✓ **Precedent Search (Beta)**
Surface the most relevant clauses from your DMS with natural language prompts

“We believe Litera Draft Advanced will be the differentiator by giving us the competitive edge to increase efficiency and to better deliver client needs.”

— Director of Business Transformation,
Am Law 100 Firm
