# Modern Endpoint Management
Simplify Device Management

Solution Brief

In today's dynamic work environment, organizations require robust, flexible, and secure management of devices and applications to ensure productivity and security across all endpoints. Our Intune Deployment service is designed to help businesses seamlessly transition to a modern device management solution using Microsoft Intune, part of the Microsoft 365 suite.

This service is tailored for IT administrators, security teams, and CIOs looking to enhance their organization's endpoint management capabilities, reduce IT overhead, and improve security posture.

Business challenge

- **Device sprawl** increases management complexity, straining IT resources and budgets.

- **Inconsistent security policies** across diverse devices lead to potential vulnerabilities.

- **Difficulty enforcing compliance** with regulatory standards **on unmanaged personal devices.**

- **Limited visibility** into device health impacts security and operational efficiency

- **Streamlining Application Deployment and Updates:** Efficiently deploying and updating applications for the Windows endpoints

How LiveRoute can help

Our service provides tailored Intune deployment, By partnering with us for Microsoft Intune consulting and deployment, you can effectively manage your mobile devices, enhance security, and improve overall productivity

Outcomes

- ❑ Increased Productivity
- ❑ Enhanced Security:
- ❑ Streamlined App Deployment:
- ❑ Increased Visibility
