# SAP on Azure:

Optimize your cloud journey and run your business towards success

SAP workloads can be the most mission-critical for any organization. Deploying them to Azure gives you the infrastructure for all your SAP workloads needs.

Confidently migrate your SAP environment to Azure with LiveRoute. LiveRoute is expertise in migrating such mission-critical workloads on Microsoft Azure Infrastructure. LiveRoute digitally transforms your business processes and workloads to the cloud.

Why run SAP on Azure?

- Improves productivity
- Increases in ROI
- Maximized security
- Agility
- Cloud scalability
- Global support
- Flexibility & Scalability

Cloud platform optimized for SAP

- Provides infrastructure for all SAP workloads
- Certified to run mission-critical SAP applications
- Enormous reach and reliable architecture

Continuous Innovation

- Digital innovation by leveraging Artificial Intelligence, DevOps, Big Data and analytics

Highest security and compliance standards

- Industry´s largest compliance portfolio for SAP workloads
- Most trusted cloud globally
- Supports security and compliance needs with enterprise-grade security and privacy built-in

Deliver value to Business

Proof & Statistics

- One Stop Solution
- Same costs by increasing the efficiency 30%
- Highly available and secure

Proof & Statistics of Joint Solution

- Flexibility to keep the architecture you are comfortable with while maximizing the agility, scalability, and efficiency
- Reduced cost up to 30 – 50 % annually
- Higher availability and disaster recovery for business continuity with 99,99% uptime
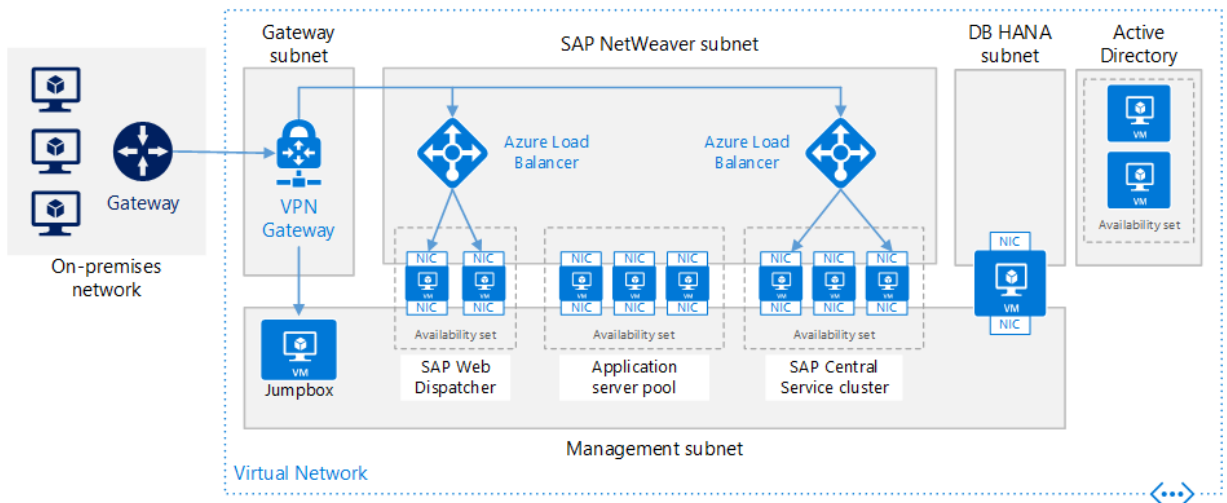

Desired Outcomes

- Reduced costs, highest flexibility and performance comparing to what private cloud hosting can provide
- Ensure that your SAP applications always have the storage and compute resources they need with infrastructure flexibility from Azure
- A platform for future digital transformation and innovation

How can we facilitate you?

- Analyze your requirements and priorities
- Assess your current digital estate and readiness
- Define enhancement and deployment plan
- Recommend next steps

Why LiveRoute?

LiveRoute is the leading cloud services provider and Azure partner of choice for companies across world. With years of industry experience and excellent expertise, we help enterprises stay a step ahead in their cloud migration journey.

LiveRoute work as an extension to your team to help you in assessment, developing suitable cloud migration strategy, enabling Azure and end-to-end migration of mission critical instances onto Azure. We ensure the best practices, compliance and security in design across SAP and Azure.
