What Does Engage IoT Do?

Our Engage IoT platform unifies kiosks, digital signage, websites, and apps under one user-friendly system, providing real-time control over hardware and cloud-connected devices from a single, centralized source.

The Engage IoT logo is centered within a white rounded rectangle. It features a teal circular icon with a white '@' symbol, followed by the word 'engage' in teal lowercase letters and 'IoT' in a smaller teal font.

Manage

CENTRALIZED CONTROL

Manage Centralized management allows businesses to control software, content, and security features from one platform. Engage IoT enables seamless device updates, remote access for troubleshooting, and secure control over userroles and permissions—all from a single dashboard.

🔍 Monitor

REAL-TIME MONITORING

With real-time monitoring, Engage IoT provides an overview of the status of all connected devices, including hardware health, inventory levels, and session activities. Set up alerts to notify support teams immediately, ensuring issues are resolved quickly, minimizing downtime.

Report

STANDARD AND CUSTOM REPORTING

Get insights with standard and custom reports to track device performance, inventory, and transaction data. Engage IoT helps businesses make data-driven decisions with real-time metrics, improving efficiency and ensuring that demand and inventory are always in sync.

Why Choose Engage IoT?

Choose Engage IoT for its pre-built features to help reduce development costs, while benefiting from easy integration and robust security. The platform reduces time to market and lowers operational costs by consolidating management tasks into one solution, ideal for scaling digital engagement strategies efficiently.

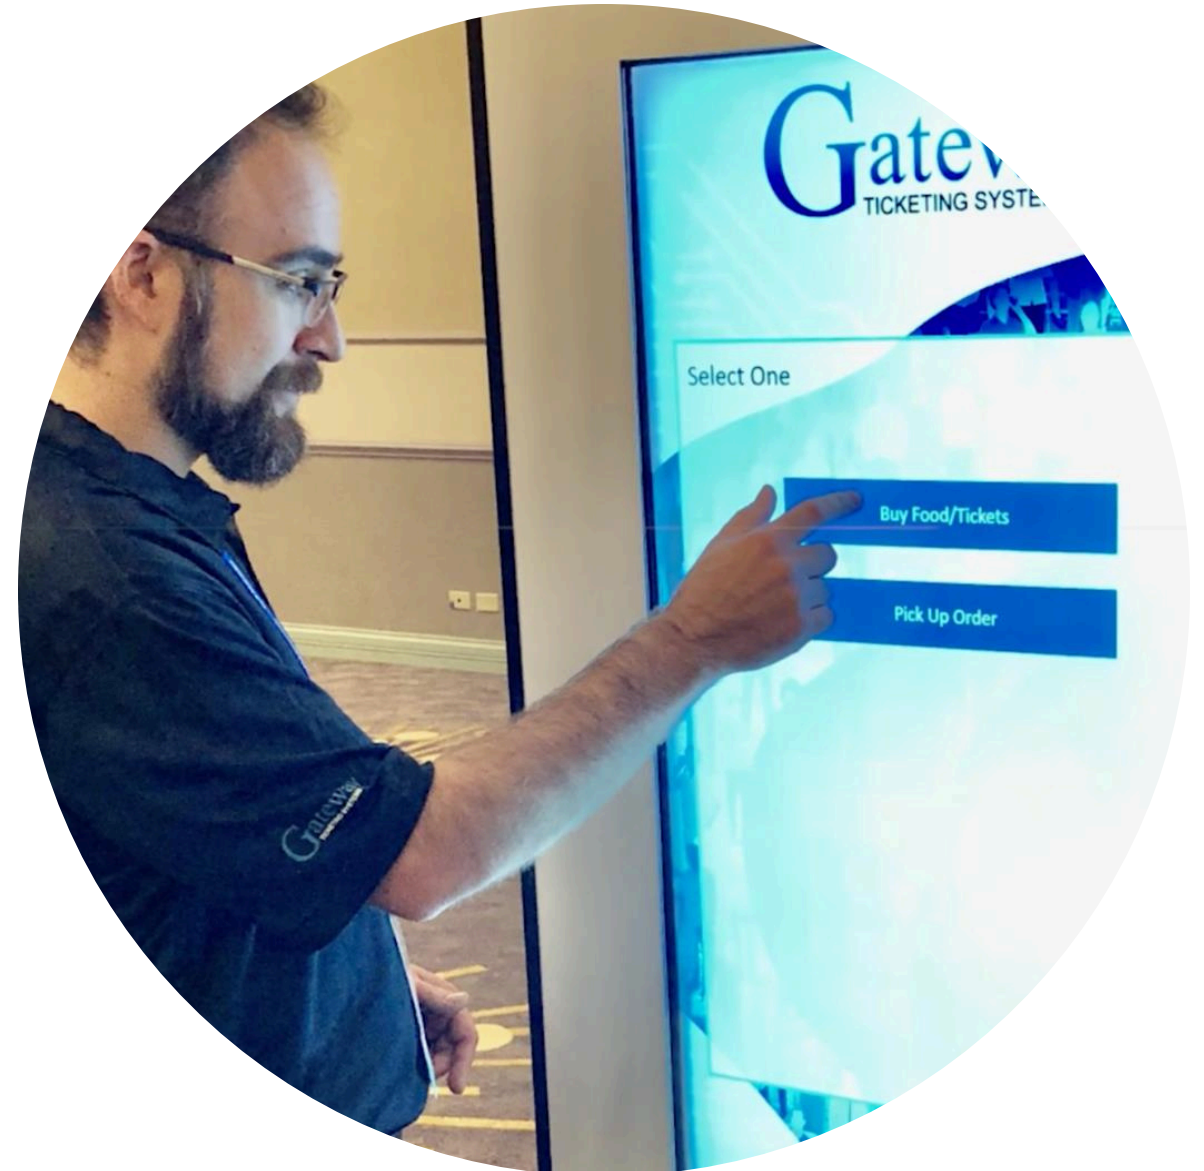

Benefits for Businesses

Increased Efficiency: Consolidate management tasks into one platform, streamlining operations and reducing maintenance time.

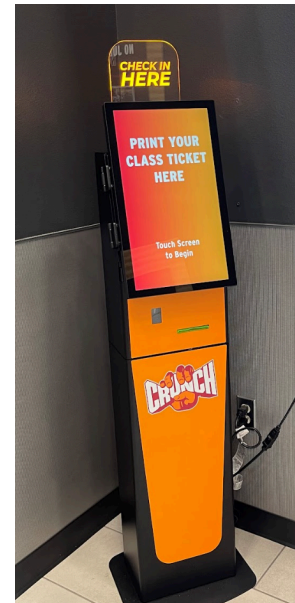

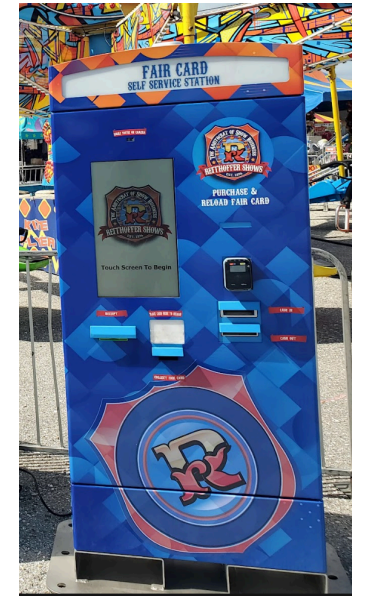

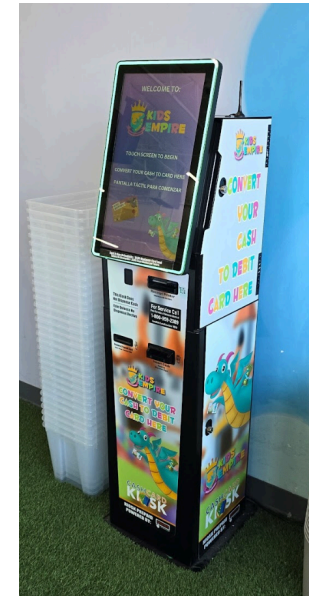

Enhanced Customer Experience: Real-time data and centralized control enable quick issue resolution, boosting engagement and satisfaction.

Scalability: Engage IoT adapts to businesses of all sizes, fitting diverse industry needs with ease.

Applications and Use Cases

- Retail & Hospitality
- Healthcare & Education
- Transportation
- Corporate and Government
- Fitness Centers & Gyms
- Smart Cities
- Manufacturing and Warehousing
- Entertainment Venues
