

Landing Zone

Moving to the cloud? Be sure you reap the benefits.

HOW IT WORKS:

Our team will deliver an agile cloud solution which will help your organization react quickly to changing circumstances without introducing risk to your business. BDO's advisors will help you set up stable, secure and scalable foundations, configured to meet your specific needs.

The framework covers Microsoft Azure Cloud components such as Compute, Storage, Database, Security & Authentication, Monitoring & management services, Azure Networking, Web & Mobile.

TIMELINE:

STEP 1: Design a baseline environment including security & compliance processes, standardized tenancy, identity & access management and networking

STEP 2: Deploy a customized landing zone including agreed specifications around cloud configuration, security and base framework architecture

STEP 3: Operationalize for flexible architecture, supported by strong governance to maintain and update your landing zone as all aspects of cloud environments evolve

RESULTS:

- ▶ Cloud environment framework
- ▶ Governance recommendations
- ▶ Operational guide
