

DevSecOps

Increase speed to market while effectively managing risk

HOW IT WORKS:

BDO Digital will help you modernize your software delivery workflow through scalable tools so pipelines can be automated, and updates rolled out without a break in the system.

Throughout this process, your organization will be able to discuss current and future needs with our experts in order to guide the journey from current to future state. The ultimate automation of your organization's processes will enable you to leverage resources and move further towards your future stage goals.

TIMELINE:

STEP 1: In-depth assessment of current state to discuss needs, efficiencies, and best practices

STEP 2: Develop roadmap to guide the journey from current to future state

STEP 3: Migration of data between current and old/outdated systems to ensure nothing is lost in transition

STEP 4: Automate processes to enable efficiency and precision

RESULTS:

- ▶ Modernized workflows
- ▶ Scalable tools
- ▶ Minimized risk of disruption during updates
- ▶ Increased DORA best practice score
