Goals, Requirements, and Components of Microsoft 365 Copilot

The workshop's goals are:

Art of Possibilities: A comprehensive introduction to Microsoft 365 Copilot, including its components, potential, benefits, and boundaries.
2. Licensing Readiness: An explanation of licensing requirements to enable the Microsoft 365 Copilot.
3. Technical Readiness: A detailed assessment of current data governance, identifying areas that require strengthening against unwanted data leakage and unauthorized access.
4. Adoption and Change Management: Strategies for easy user adoption and ensuring a smooth transition to innovative workflows and organizational productivity.

By the end of the workshop, you will gain the following:
- Knowledge about the advantages and features of Microsoft 365 Copilot for your organization.
- A roadmap to activate Microsoft 365 Copilot with the necessary licenses and subscriptions.
- Understand the specific measures to enhance your data security environment, considering your current license profile and security posture.
- Comprehension of the Copilot implementation journey according to user enablement and technical readiness.
