

# The number one cloud-hosting partner for complex projects today.

Your springboard for predictive data transformation tomorrow.

The most sophisticated and capital intensive projects in the world rely on LoadSpring for secure, cloud-hosted project management solutions. So should you... LoadSpring connects the dots where the hyperscalers don't. We support more than 800 customers across all project intensive industries with 200+ applications hosted globally. Our holistic solutions bring together the people, processes and technology behind your biggest projects on a single, smart-hosted platform, backed by a team of project management technology experts.

## Cloud Transformation

- 200%** faster software deployment & adoption
- 400%** improved support response time
- 80% +** reduction in help desk tickets

## Data Transformation

- 80%** increase in predictable data
- 70%** increase in data confidence
- 10X** faster access to trusted analytics

## FEATURED PROJECTS:

### Apple Headquarters

Apple chose LoadSpring for this billion dollar project because of our unique ability to seamlessly connect, manage and empower 1,000s of stakeholders with access to all project information in a single, secure, self-contained, cloud-hosted environment.

### HS2 Project

LoadSpring supports the JV teams delivering HS2, the largest and most important economic infrastructure project in Europe. HS2 will bring a landmark zero carbon, high-speed railway to the UK.

### 2012 London Olympics

LoadSpring was the hosting platform of choice to support one of the world's most closely watched events.

## Transformative Products & Services

### LoadSpring Cloud Platform (LCP)

#### Cloud Transformation

Fully leverage all of your project management applications with ease, collaboration and intelligence. LCP's cloud-enabled data platform is designed to meet all of your current and future project management, data and analytics needs.

- Cloud Readiness Assessment
- Security
- Managed Cloud Hosting
- Application Rationalization and Integration
- User Rationalization
- Fully Supported

---

### LoadSpring INSIGHTS

#### Predictive Data Transformation

Transform your understanding of past, current and future projects. LoadSpring INSIGHTS cleans and presents your application data for use in business intelligence, machine learning and predictive analytics. With every new data point, your projects and our technology get smarter.

- Data Extraction, Storage, Cleansing & Mining
- Data Analysis and Predictive Analytics
- Machine Learning
- Data Visualization
- Data Integration

**LoadSpring deploys software 200% faster than traditional teams using our proven delivery templates.**

### SUPERIOR CLOUD HOSTING

- Best-in-class portfolio of 200+ cloud-based project management applications
- Unparalleled interoperability and customization between apps
- Government level security for secure, global collaboration
- Single sign-on access including mobile
- On-demand tech support, expertise, and advisory services
- A whole new dimension in business intelligence and predictive analytics
