

Add Data-Centric Security to Your Applications in Minutes

File-level DRM. Continuous control. Built for developers.

Persistent Protection
Even located in alternate storage

Real-Time Access Control
Every open is verified

Live Policy Enforcement
No gaps, no delays

Audit & Compliance
Built-in Reports ready out of the box

Security is applied directly to the file—ensuring continuous control wherever your data goes.

cURL

Python

Node.js

Java

```
1 POST /v1/files/protect
2 Authorization: Bearer {API_KEY}
3 Content-Type: application/json
4
5 {
6   "file_url": "https://yourbucket/doc.pdf",
7   "policy": {
8     "permissions": {"download": false,
9                     "print": false, "copy": false},
10    "expires_at": "2025-12-31T23:29P59Z",
11    "geo_restrictions": ["US", "CA"]
12    "sessions": "3"
13  }
14 }
```

- ✓ RESTful API with open standards
- ✓ Integrate in minutes with any stack
- ✓ No infrastructure changes
- ✓ Scalable, secure enterprise-ready

Why Locktera CORE API?

Bring enterprise-grade data-centric security to your application-without building it.

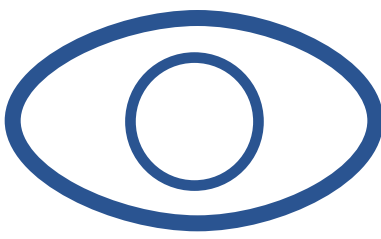

Control Doesn't End When You Hit Send

Security stays with the file wherever it goes.

DRM at the File Level

Granular controls for access, viewing, sharing, printing, downloading, and more.

Real-Time Enforcement

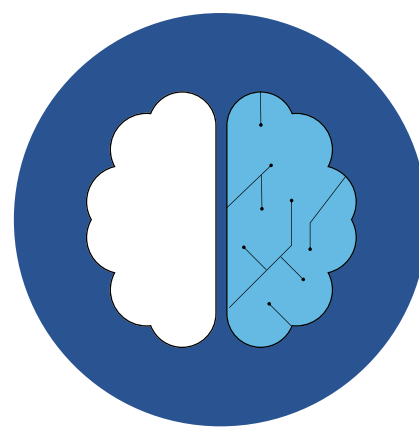

Every access is verified. Policies are enforced in real-time.

Built-In Compliance & Reporting

Audit trails and compliance reports—ready out of the box.

Built for Modern Use Cases

AI Applications

Protect training data, model inputs, and outputs. Ensure only authorized access, every time.

Secure Backups & Archives

Keep backups safe and inaccessible without authorization—even if storage is compromised.

Secure File Transfer

Share sensitive files with full control. Revoke access anytime, even after deliver.

How It Works

1 Update File
Upload to your storage or ours.

2 Apply Protection
Use our API to apply security policies.

3 Get Secure Link
Receive a secure link to share

4 User Access
Access is verified in real time.

5 Maintain Control
Revoke, expire, or modify access anytime.

Developer Friendly

- Simple, clean API
- SDKs for popular languages
- Comprehensive documentation
- Web UI for validation
- 99.9% uptime S:A

Complete Visibility & Compliance

- Track who accessed what, when, and how
- Monitor policy enforcement and violations
- Exportable reports for SOC 2, ISO 27001, GDPR, HIPPA, and more
- Tamper-evident audit logs

Enterprise Security, Your Way

- Your data, your storage
- BYOK encryption support
- SSO / SCIM / IdP integration
- Global policy controls
- Multi-tenant ready
