

Adopt Copilot securely and at scale, grounded in Logicalis' lifecycle services across cloud, connectivity, collaboration, and security.

Overview

Copilot for Microsoft 365 introduces new ways for your employees to work, new business models for your organization, and a new way to engage with customers. Preparedness, risk mitigation, and targeted actions across IT and the business are essential. Our in depth assessment is an important step toward introducing generative AI into your organization.

The goal of the assessment is to identify any business or technical issues and any blockers that could prevent or delay you from deploying Copilot for Microsoft 365.

Assess Your State of Readiness

Our approach starts by understanding your state of readiness through interviews and technical review. We can meet in person or virtually.

- Facilitated, agenda based session with business sponsors, stakeholders, and IT to understand your AI journey
- Identify blockers due to data Copilot cannot access with recommendations for integration and discoverability
- Identify line of business apps to integrate with Copilot for Microsoft 365 with integration recommendations
- Evaluate data security, governance, and lifecycle controls aligned to business and technical requirements
- Review Microsoft 365 security posture across SharePoint, Microsoft Entra, Microsoft Intune, Microsoft Defender for Cloud Apps, Microsoft 365 Apps, OneDrive, Microsoft Purview, and more
- Evaluate governance around sharing controls within SharePoint and OneDrive
- Identify inactive SharePoint sites and sites that should be restricted
- Evaluate existing access governance controls and provide recommendations for governing Copilot for Microsoft 365
- Optional: Enable a trial of SharePoint Advanced Management to assess SharePoint and OneDrive security policies, permissions, data governance, and content lifecycle

Readout and Deliverables

At the end of the assessment, we host a readout session to review findings, gap analysis, and remediation recommendations. All items discussed are provided in a detailed document delivered after the session.

Next Steps

Next Steps: Click Contact Me and our team will schedule a pre engagement call to scope the assessment around your needs and provide an estimate for duration, availability, and pricing.
