

# Teams Direct Routing Service

Use Microsoft Teams for all your telephony.

- Do you use Teams for meetings and your phone for phone calls?
- Do you have multiple contact lists depending on where you call them from?
- Do you receive many invoices for your telephony?

Our Direct Routing Service connects Microsoft Teams customers with the PSTN directly from their Teams clients.

In addition, the service is fully integrated with The Logicalis Voice Core, which enables us to provide seamless integration between your Teams users and your legacy PBX users.

Finally, our solution is available on a per concurrent call model, so you only pay for the capacity that you use.

Simple, consolidated, cost-effective telephone from a single desktop client

Simplicity 	Consolidation 	Cost Effective 
<ul style="list-style-type: none"> <li>• Simple calling</li> <li>• Everyone is reachable on one number</li> <li>• No need to consider about what device to use to make a call</li> </ul>	<ul style="list-style-type: none"> <li>• Single Desktop Client</li> <li>• Use Teams Client to call anyone</li> <li>• No need for three apps and a physical phone on the desk to do the job</li> </ul>	<ul style="list-style-type: none"> <li>• Nominal fee per user</li> <li>• Calls between Teams and The Logicalis legacy PBX are free</li> <li>• Single, easy to read invoice for all my telephony</li> </ul>
