

LOGICALIS TEAMS PREMIUM

Microsoft Teams for simplified collaboration

Microsoft Teams is the number one technology for any company transitioning to an age of hybrid work, remote collaboration, and communications

Microsoft Teams meetings help people stay focused and be more productive before, during and after meetings, so your teams save time and accomplish more together. Microsoft Teams Rooms help remove the barriers between spaces, places, and people and are thoughtfully designed to deliver inclusive meeting experiences with all participants in mind.

Microsoft Teams Premium, built on the familiar all-in-one collaborative experience of Microsoft Teams, Teams Premium brings the latest technologies, including Large Language Models powered by Open AI's GPT-3.5, to make meetings more intelligent, personalized, and protected—whether it's one-on-one, large meetings, virtual appointments, or webinars. Today, many organizations not only pay for meeting solutions, but also purchase expensive add-on products for webinars, virtual appointments, meeting intelligence, and more. With Teams Premium, customers can get these advanced meeting capabilities and more for one low cost.

Scope of works
