

Managed Cloud Cost Management

11 January 2023

Presented by Jane Surname

Challenges

Lack of visibility.

Lack of centralised visibility across all cloud subscriptions leads to lack of insight to where cloud over-spend is happening and where costs could be reduced.

Lack of time and expertise.

There is a lack of time and expertise in cloud teams to continually apply cost controls to prevent over-spend and optimise all cloud environments to reduce spend.

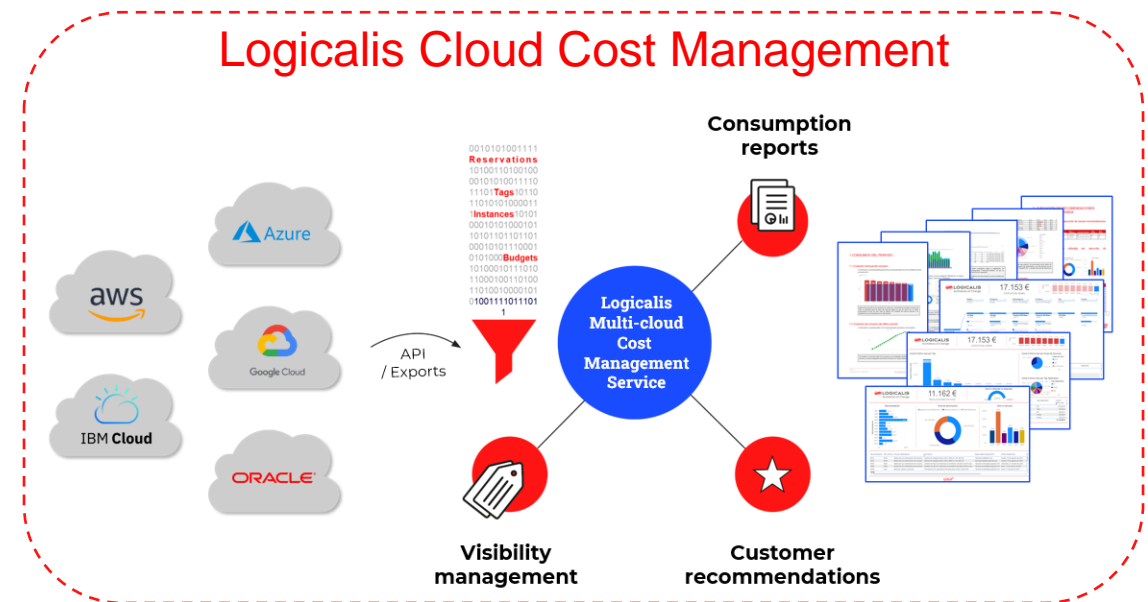

Wasted spend.

Gartner estimates 32% of monthly cloud spend by an organisation is wasted on non-optimised resources.

Service Overview

- ▶ A service built on Logicalis-developed tooling and delivered by our experts
- ▶ Provides a single view of cloud costs across all cloud subscriptions, broken down by service, department or user-configurable tags
- ▶ Cost control recommendations include:
 - Reserving instances over 1-3 years
 - Savings plans over 1-3 years
 - Licence optimisation
 - Performance-tier optimisation
 - Instance optimisation
 - Housekeeping of zombied-services
 - Power schedules for non-24/7 services
 - Data tiering policies
 - Auto-scaling policies
- ▶ The service is accessed through our web portal, from any device

Benefits of the Service

Insights into current and forecast costs

Gain consolidated visibility of multi-cloud costs broken down by service and line of business. Trend current costs to predict future cloud consumption costs.

Control costs

Centralised policies and schedules are configured to automate cost controls across a multi-cloud environment and make monthly costs predictable.

Reduce costs

Recommendations to reduce costs by taking advantage of different cost models, such as Reserved Instances or Spot Instances for different types of workloads across multi-clouds.

Optimise costs

Recommendations to change cloud resources when instances are over-sized and to transform certain IaaS workloads to PaaS across multi-clouds.

Existing customers across Europe

Next Steps

- ▶ A discovery workshop, including
 - A presentation and demonstration by one of our experts
 - A discussion between your team and ours on your requirements
- ▶ A proposal for our Managed Cloud Cost Management, tailored to your requirements and environment

Thank you
