

Founded with the vision to empower businesses to start the journey of IT modernization and optimization through the use of Cloud computing, LogicEra is helping customers accelerate digital transformation.

Taking leading businesses to Cloud and re-defining the business success by making the most of the IT platform and data available using LogicEra expertise.

LogicEra is the digital transformation team every business needs to tackle this IT evolution head on.

Our expertise in workload management ensures cost efficiency along with smooth migration.

The technology industry is dynamic and we are constantly on the lookout for new technological developments so as to enhance business practices to ensure that the clients are able to take full advantage of technology.

Whether you are a business who wants to optimize the total cost of ownership of your IT set-up by moving to the Cloud or you are an e-procurement portal where your primary revenue is from in-house application development, we can assist you.

Our expertise, your success.
