✓ Application Migration Planning	✓ Cloud Application Modernization	✓ 24x7 Managed Cloud
✓ Infrastructure Assessment	✓ Cloud Migration Services	✓ 24x7 Security Operations Center
✓ DevOps Maturation Model	✓ DevOps Services	✓ Cloud Optimization
	✓ Cloud Journey Management	✓ Application Management

CASE STUDY

Challenge: A global retailer's legacy infrastructure was holding them back from responding quickly to customer trends, and their enterprise architecture was full of bloated customized software that was slow to change.

Approach: Logic performed an integrated process to migrate CPUs to the cloud and refactor applications to serverless design.

Value Delivered: The transformation delivered an aligned and standardized process across multiple business units, an increased average time to market, and an overall 40% decrease in annual infrastructure costs.
