Azure Well-Architected Review

Review and remediate your cloud to meet Azure best practices.

Implement Azure cloud
best practices

Reduce Cloud Costs
and Maximize ROI

Improve Security
and Compliance

Our Review Process

A Well-Architected Review is designed to help you identify and fix potential issues with your Azure environment. By working with Logicworks as an Approved Well-Architected Review Partner, you get the same Review you would get from Solutions Architects, all at net-zero cost to you.

Assess

Logicworks conducts an
Azure Well-Architected
Review (2-3 hours).

Report

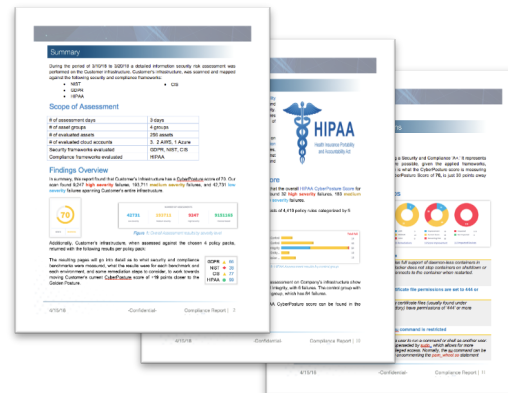

We deliver a formal report of
findings, including a ranking
of remediation steps

Remediate

If desired, our Certified
Engineers provide
consulting services

What We Deliver

- 2-3 hour assessment of in-design or production workload using principles of Azure Well-Architected Framework
- Report of findings, including list of priorities for remediation and recommendations for future improvements

Solution Brief:
Well-Architected Review

“Logicworks’ assessment gave our team confidence in the security of our cloud architecture.”

Well-Architected Framework

Our Cloud Optimization services are based on the Well-Architected Framework, a cloud-neutral standard that provides cloud best practice guidance in five key pillars: Security, Reliability, Performance, Cost Optimization, and Operational Excellence. It helps you assess your workload against a proven standard so that you can build better cloud systems.

Security

Identity & Key Management

Encryption

Security Monitoring & Logging

Dedicated Instances

Compliance

Governance

Reliability

Service Limits

Multi AZ/ Region
