

Kickstarter Azure Virtual Desktop

The Azure Virtual Desktop Kickstarter quickly enables cloud-based desktops and applications that are directly consumable within your organization.

Business

What's Microsoft Azure Virtual Desktop

Azure Virtual Desktop (AVD) is a comprehensive desktop and app virtualization service running in the cloud. AVD delivers multi-session Windows 10/11, optimizations for Office 365 ProPlus, and support for Remote Desktop Services (RDS) environments. Deploy and scale your Windows desktops and apps on Azure in minutes and get built-in security and compliance features.

When Microsoft Azure Virtual Desktop is evaluated within your enterprise, the time is limited and without the experience in this area it is a challenge to deploy desktops and applications first time right. Adopting new cloud technology could be time consuming with the risk of losing focus on the success criteria defined by the business. The Azure Virtual Desktop Kickstarter quickly enables cloud-based desktops and applications that are directly consumable within your organization.

Your partner to start using Azure Virtual Desktop

As a specialist in the area of End User Computing Orange Business has developed a comprehensive toolkit and best practices for Azure Virtual Desktop deployments. By using this service, you can evaluate AVD faster and ensure that end-users have a great experience the first time they use their new Azure Virtual Desktop.

Ensure that end-users have a great experience the first time they use their new Azure Virtual Desktop
