## Managed Cloud Hosted Desktop & Apps

Business enabled virtual desktops and applications running on Microsoft Azure Virtual Desktop

**Business enabled virtual apps and desktops, directly consumable within your organization by using the benefits of the cloud (scalable and flexible, secure by design, pay per use and available worldwide).**

### What is Managed Cloud Hosted Desktop & Apps

Managed Cloud Hosted Desktop & Apps is a business enabled and ready to use Windows workspace running on Microsoft Azure Virtual Desktop (AVD), that delivers virtual apps and desktops in Azure accessible from any location and any device. For specific use cases, extra graphics capacity can be provided to enhance the workspace.

### Why customers use Managed Cloud Hosted Desktop & Apps

#### At-a-glance

- Business enabled managed workspace for apps and desktops running in Azure
- Remote application launcher for Win32 business applications, to complete the Modern Workplace
- When needed AVD can be enriched with Citrix or VMware running on Azure and support hybrid cloud

### Business Enabled virtual apps & desktops

- Cloud-based desktops and applications
- Directly consumable within your organization
- Deploy desktops and applications first time right

#### Empower your employees

### Secure access to data and applications

- Accessible from anywhere on any device
- Secure by design
- Protection against data leaks and malware infection since no local client data

#### Secured company data

### Scalability and flexibility

- Easy scale AVD capacity up and down
- No Capex but Opex
- Pay per use

#### Desktop as a Service

# Managed Cloud Hosted Desktop & Apps is a business enabled workspace service build on Microsoft AVD
