Gamification Engine

What is it

Gamification supports users' engagement and learning process, enriching the overall experience and promoting people involvement and loyalty.

Gamification can be used as a behaviours trigger, creating engagement and participation throught contests and rewards.

The technology, Gamification Engine by Logotel

Integration layer from and to Sharepoint/Graph to share data on users' actions.
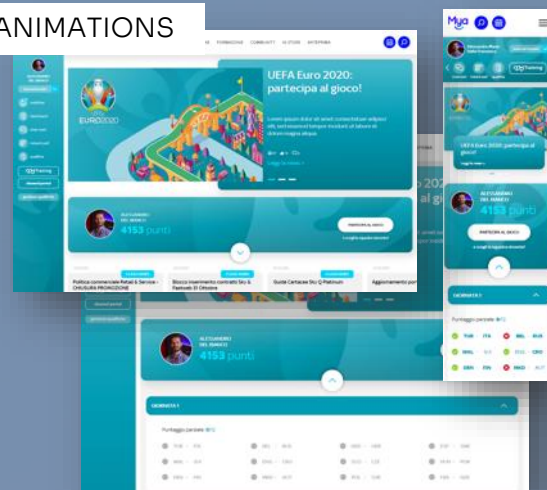

The engine is developed and maintained by a dedicated team with the support of a Microsoft MVP Partner.

Advanced analysis & reporting

From "raw" reports (CSV/Excel files) to platform integration (like Power BI) and the creation of personalized dashboards with aggregated data.

Data can be visualized directly from the Community (front-end or back-end) or send to Client's systems through API or Webservices.
