Long View

Upgrade to Azure SQL for a Smarter Cloud Solution

Migrate your workload to Azure SQL with minimal disruption and maximum efficiency. Long View's end-to-end migration service ensures a seamless transition, helping you move to the cloud with ease.

Seamless, Risk-Mitigated SQL Migration

Long View delivers a structured, risk-mitigated process that enhances scalability, security, and performance. We ensure a seamless transition with a four (4) step approach:

STRATEGIZE

- **Assess**
  Analyze your current SQL environment, and identify dependencies, bottlenecks and required SQL Server features.
- **Plan**
  Define your migration strategy—lift-and-shift (IaaS), re-platforming (Managed Instance), or re-architecting (Azure SQL Database).

OPTIMIZE

- **Migrate:**
  Securely deploy your database to Azure SQL while minimizing risk and ensuring integrity through replication and failover testing.
- **Scale:**
  Optimize workloads and scale appropriately for SQL Database or Managed Instances.

MODERNIZE

- **Execute:**
  Carry out database modernization strategies like schema conversions.
- **Scale:**
  Conduct application compatibility assessments to ensure smooth integrations.

VALIDATE

- **Optimize:**
  Fine-tune and optimize query performance, indexing, and workload distribution for efficiency and cost savings.
- **Review:**
  Ensure database security, encryption standards, and compliance alignment via thorough validation and testing.

Upgrade to Azure SQL with Long View

Migrate from costly, hard-to-manage legacy infrastructure to Azure SQL and benefit from:

SCALABLE CLOUD DATABASE

Implement a fully managed SQL environment with auto-scaling and built-in optimizations.

ENHANCED RISK MITIGATION

Strengthen your infrastructure with threat detection and proactive loss prevention measures.

ADVANCED DATA PROTECTION

Safeguard critical data with advanced encryption, access controls, and intelligent threat detection.
