

# Accelerate Remote Work with AVD in 30

Enable secure, scalable remote work with Azure Virtual Desktop (AVD) in 30, a six (6)-week structured engagement designed to deploy AVD for up to 100 users.

## Virtual Desktop Deployment with Long View

Long View's structured, expert-led engagement designs, implements, and validates an AVD environment that enhances remote work capabilities.

### INITIATE

- **Align:** Conduct kickoff meeting to align expectations and establish project scope.
- **Outline:** Define access, assign key stakeholders, and outline project deliverables.

### DESIGN

- **Identify:** Capture business and technical requirements for AVD deployment.
- **Assess:** Evaluate applications, security policies, and compliance needs.

### CONFIGURE

- **Develop:** Deploy a customized AVD Desktop Image.
- **Deploy:** Test the AVD environment and host pool.

### OPTIMIZE

- **Define:** Host a workshop to define success criteria and prepare users.
- **Document:** Prepare user documentation for training purposes.

### TRANSITION

- **Deliver:** Create an operational support plan for AVD maintenance.
- **Conduct:** Lead a handoff meeting to ensure seamless transition to internal teams.

### MONITOR

- **Conduct:** Check in with weekly project status meetings to track progress.
- **Report:** Provide regular reporting, aligning on deliverables and project closure.

## Accelerate Virtual Desktop Deployment with AVD in 30

Long View's AVD in 30 streamlines virtual desktop provisioning, management, and scalability to optimize IT operations.

### VIRTUAL DESKTOP OPTIMIZATION

Automate desktop provisioning, minimize IT workload, and improve user experience with AVD.

### MANAGEMENT & SECURITY CENTRALIZATION

Simplify administration, enforce security policies, and ensure compliance with centralized management.

### IT COST EFFICIENCY & SCALABILITY

Expand AVD environments while reducing infrastructure costs and eliminating hardware constraints.
