

Long View

Azure Kubernetes Service

A comprehensive approach to Azure Platform Modernization

KEY DRIVERS

- We need help identifying the business value of application containerization
- We are unsure of how to get started securely in containerization
- We need help deploying and operating Azure Kubernetes
- We need to accelerate our application development
- We want to utilize Infrastructure as code with Kubernetes

LONG VIEW'S AZURE KUBERNETES SERVICE is a set of solutions designed to accelerate application modernization and help client's gain value in their Azure investment. Long View has developed a phased approach to containerization adoption that helps Assess, Deploy, and Extend Azure Kubernetes.

Adopting containerization has many challenges:

- Finding and maintaining the right skills
- Balancing speed with security
- Adapting to new technology
- Choosing the right platform
- Staying ahead of business requirements

LONG VIEW'S APPROACH TO AZURE KUBERNETES

Assess	Deploy
Identify current maturity model	Standardize on containers for specific purpose
Map business value	Standardize an AKS for Orchestration and Operations
Identify skill gaps	Education and Operations Training
Recommend tools	Deployment of AKS delivered with Infrastructure as Code

SERVICE OUTCOMES

By choosing Long View we enable your business to:

- Accelerate application modernization
- Educate your team on how to run Kubernetes operations
- Run Kubernetes securely on Azure cloud
- Adopt an Infrastructure as Code approach
- Free up core IT personnel to focus on your business, and;
- Partner with an Azure Expert MSP provider and Microsoft Partner of the year.
