

# Identify Data Security Risks in Your Organizational Data

Understand your security risks to develop a security action roadmap with Long View's Data Security Engagement.

## Act on Data Security Risks Now

With the datasphere expected to double by 2026, the volume and complexity of data will only continue to rise.

Assess your data security, privacy, and compliance risks by analyzing user behavior with Long View's strategically curated data security workshop. This engagement is focused on four (4) milestones:

### (1) DOCUMENT

- **Pre-Engagement Meeting**

Highlight your organization's objectives, strategy, and specific requirements for data security, privacy, and compliance.

### (2) INVESTIGATE

- **Data Security Check**

Learn to detect, investigate, and promptly mitigate risks around data security and privacy, evaluating Exchange, SharePoint, Teams, and Purview's Insider Risk Management.

The data security check follows a modular design, with both mandatory and optional modules, as outlined below:

<b>Mandatory</b>	<input checked="" type="checkbox"/> Exchange Online	<input checked="" type="checkbox"/> SharePoint Online	<input checked="" type="checkbox"/> Microsoft Teams	<input checked="" type="checkbox"/> Insider Risk Management
<b>Selectable</b>	<input type="checkbox"/> Compliance Manager	<input type="checkbox"/> On-Premises Data Stores	<input type="checkbox"/> Windows 10/11 Endpoints	<input type="checkbox"/> Communication Compliance

### (3) ACCELERATE

- **Microsoft Purview Portfolio Overview**

Explore how you can accelerate your compliance journey using the latest Microsoft technologies, such as Microsoft Purview.

### (4) RECOMMEND

- **Define Next Steps**

Gain actionable insights and immediate next steps, tailored to your business needs and objectives.

# Create a Safe Workplace and **Protect Company Assets**

Long View has received multiple Microsoft accolades for its outstanding security support, making our data security check a valuable asset for your digital organization. This workshop is designed to meet the growing demands of data protection, safeguarding your organization's data assets with:

## ENHANCED DATA SECURITY

Protect your organization by proactively identifying and mitigating potential data security risks within the Microsoft Cloud.

## IMPROVED INSIDER THREAT DETECTION

Strengthen your defenses by analyzing user behavior to detect and prevent activities that could lead to intellectual property loss.

## FLEXIBLE & ADAPTABLE COVERAGE

Expand security checks to include on-premises environments as needed, ensuring a comprehensive and adaptable approach to data protection.
