

MDR Shield

Managed Detection & Response
for Windows Server, Desktops & Mobile

Insight on Cybersecurity Incidents

Organizations have a 30% probability of experiencing a material data breach in the next 2 years (2023 – 2025)

The average ransomware attack costs \$1.85M to remediate

The average U.S. company loses \$8.2 million/year annually due to data breaches.

The most significant privacy-related risks are:

1. Unauthorized access to company data resulting in personal information disclosure
2. Inappropriate use of company systems or confidential information.

What Your Organization Needs

Industry-Leading Tools

to prevent cyber attacks from happening, and to investigate & remediate incidents when they occur, on all their user devices and servers.

7x24 Expert Staff

to deploy, maintain, and operate cybersecurity solutions and respond & remediate threats.

Field-Proven Processes & Playbooks

that evolve over time to lower security costs through automating security responses and reducing false positives.

Outcomes Your Organization wants

Lower
Cyber-Security
